Genova

UI Screens

The mobile app for young readers, the Genova website, and the admin dashboard & CMS

47 app screens

30 website screens

25 admin screens

A CUSTAR product · October 2026

Screens show sample stories and sample data. The app is captured from the web build of the same code that ships to iOS and Android; the website and admin are shown with a test backend.

FOUNDATIONS

Brand, type and components

The app is built on the CUSTAR brand colours: purple by default, with a teal theme. The website uses the CUSTAR landing page design on every page. Charcoal text is used on teal and amber because white on teal is only 3.2:1.

Colour (app)

Purple
#ab46d2
Default accent and main buttons. White text 4.6:1

Teal
#10a19c
Second accent; the teal theme's accent. Charcoal text 4.9:1

Amber
#ffbe00
Teal theme buttons, FREE and Title of the Week. Charcoal text 9.4:1

Charcoal
#232323
Text and the admin sidebar

#7a2e99

Cream

#1C1B1F
Ink

Typefaces

App: Nunito. Hi, Ada! What shall we read today?

Website: Baloo 2 for headings, Fraunces for display, Inter for text, Caveat for handwritten labels.

Components (app)

Start reading | Add a reader | Cancel | Delete

All | Adventure | Animals | Bedtime

Live | Scheduled | Draft | FREE | Premium

Sunrise | Spark | Seeker

Design principles

- **Thumbnail first.** Covers and pictures carry every screen; text supports them.
- **Safe for children.** No ads, no prices, no purchase buttons. Grown-up areas sit behind a parental gate.
- **Reading levels, never ages.** Sunrise, Spark and Seeker are named for how a child reads.
- **Type grows with the reader.** Earlier reading levels get larger text; every child can change it.
- **Easy to tap.** Controls are at least 44 pt; the whole app works one-handed.
- **Calm rewards.** Badges and a word garden celebrate reading, with no timers and no streaks to lose.

How the app fits together

Welcome — who's reading › **Home** — week · month · shelves › **Story** — chapters · words › **Reader** — pages · The End

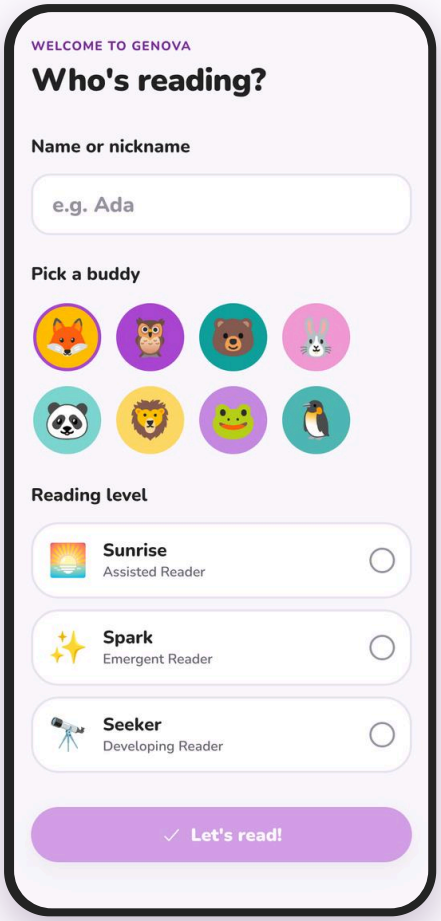

My books — reading · favourites · badges · words

Grown-ups — gate → account · readers

MOBILE APP

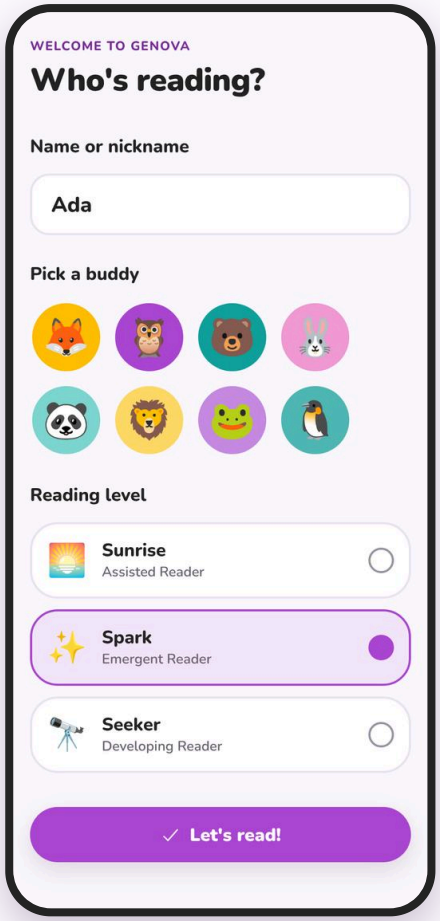

Getting started

First launch to the home screen. No account is needed to start reading.

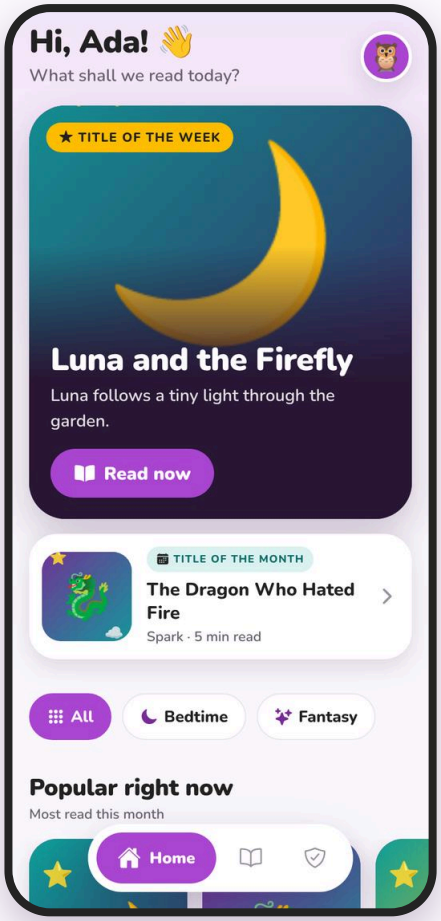

Who's reading?

First launch: a name or nickname, a buddy and a reading level: Sunrise, Spark or Seeker.

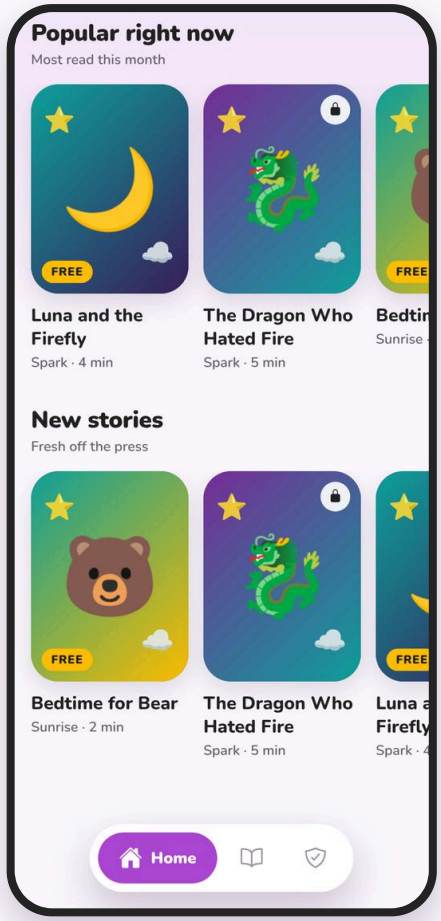

Profile ready

The chosen level is highlighted and the button turns on once a name and level are set.

Home

Title of the Week hero, Title of the Month and category chips. Covers lead every screen.

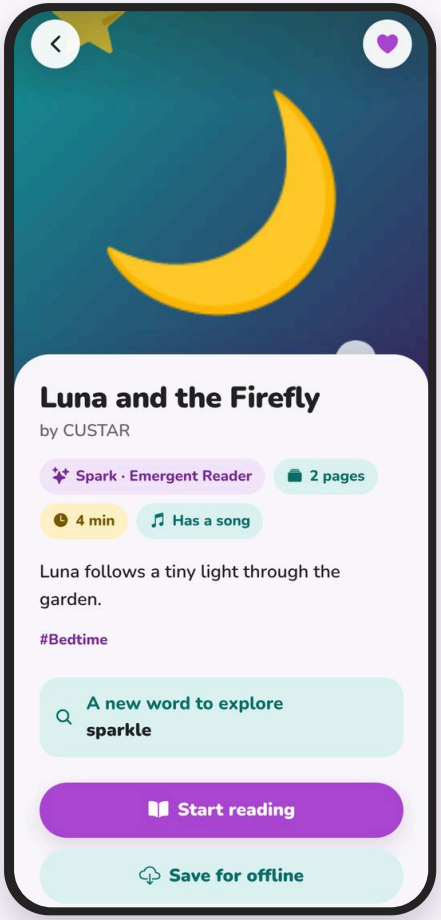

Shelves

Popular right now and New stories. FREE and lock badges sit on the covers.

MOBILE APP

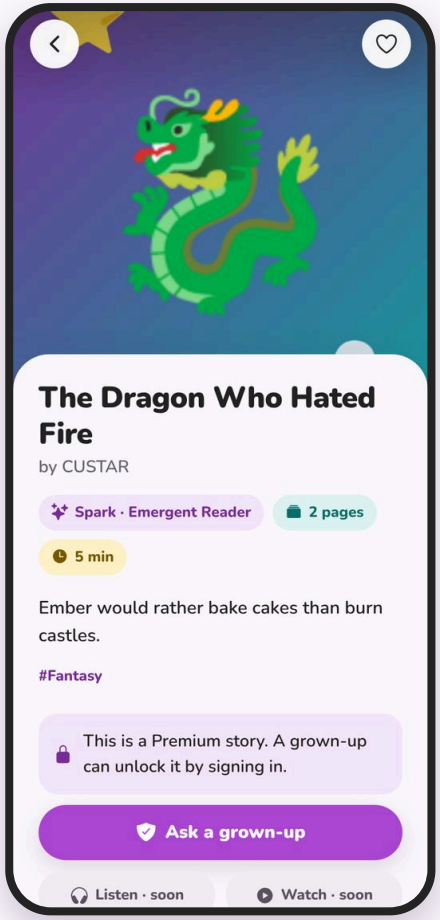

Discover and unlock

Story pages, locked stories and the parental gate that protects grown-up areas.

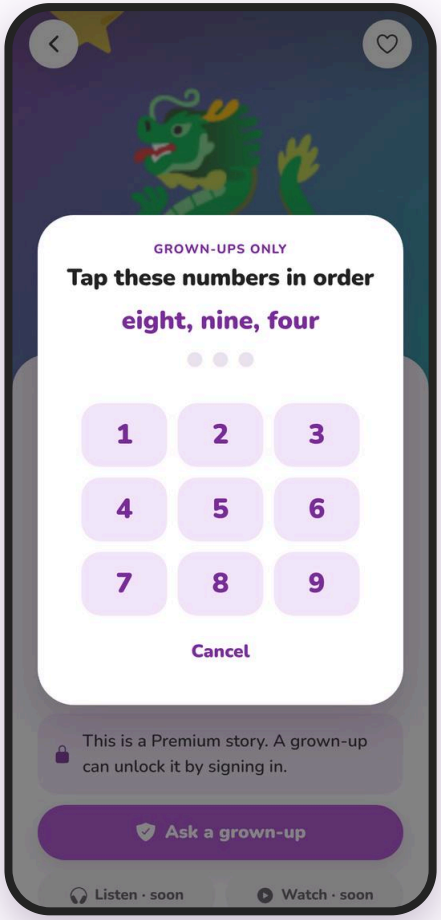

Story detail

Reading level, pages, reading time, synopsis, a favourite heart and Save for offline. Listen and Watch are reserved for later.

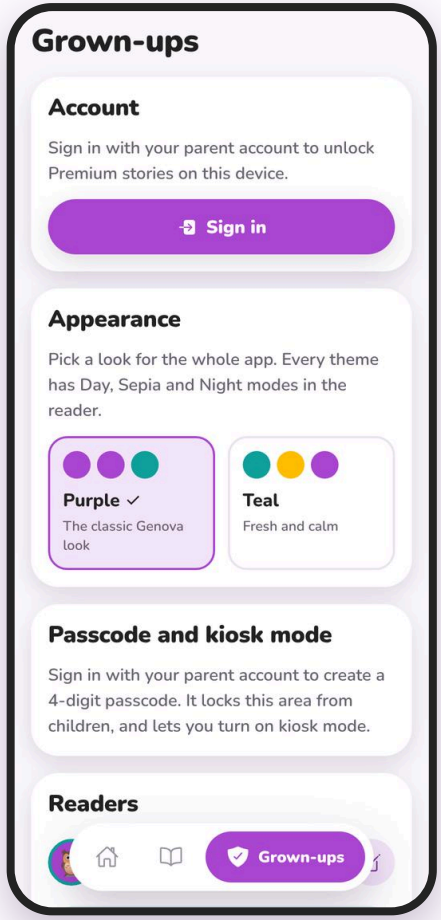

Premium story

Locked stories point children to a grown-up. There are no prices or purchase buttons in the app.

Parental gate

A number-word puzzle that pre-readers cannot solve. It guards the Grown-ups area, switching readers and web links.

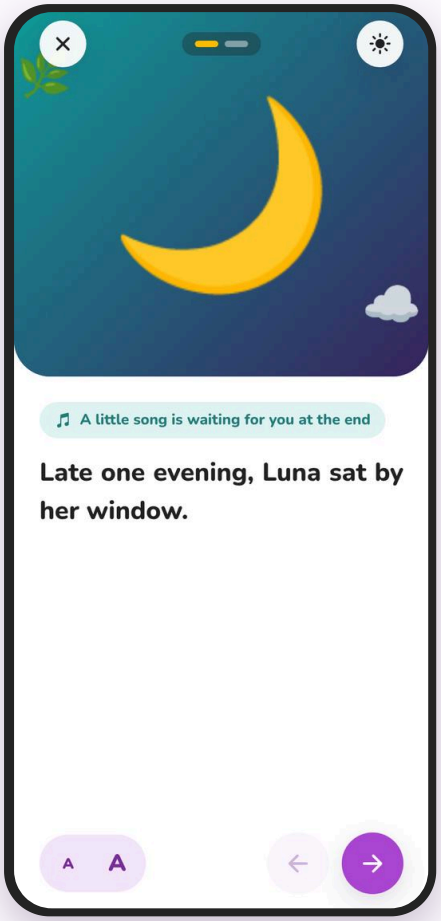

Grown-ups (signed out)

Sign in to unlock Premium on this device, manage readers and downloads, and read the privacy policy.

MOBILE APP

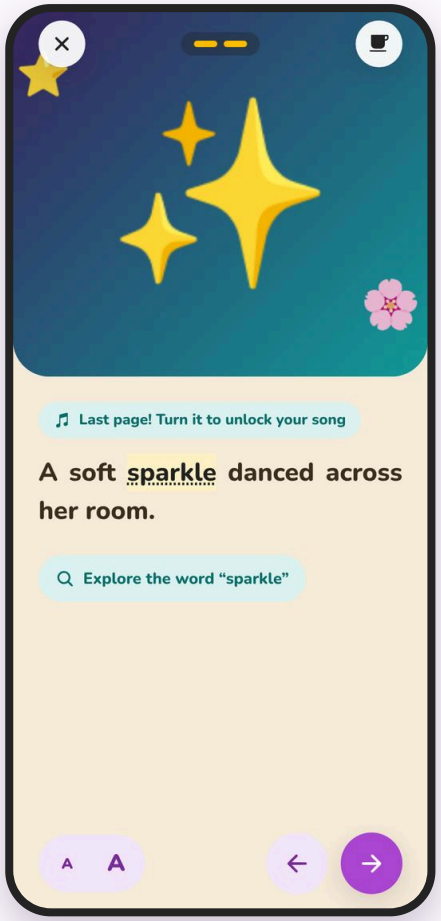

The reader

One picture per page with the text underneath, justified in a comfortable column. Type size follows the reader's level and can be changed.

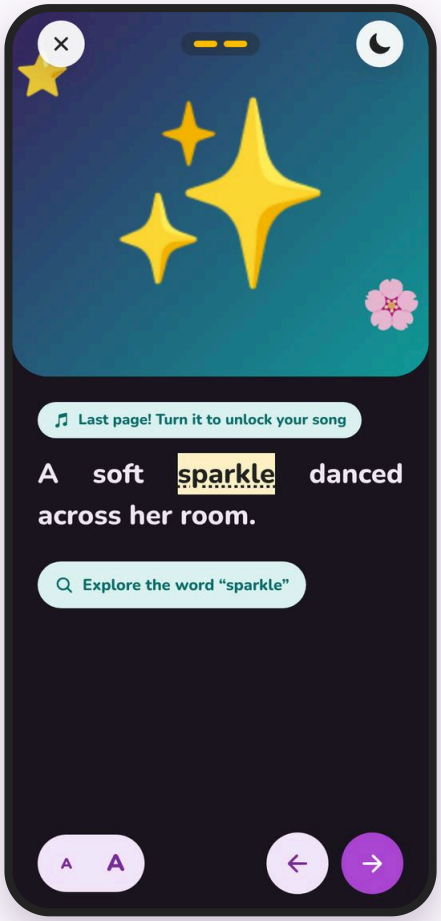

Day mode

Picture on top, text below, progress pills and big next and back buttons.

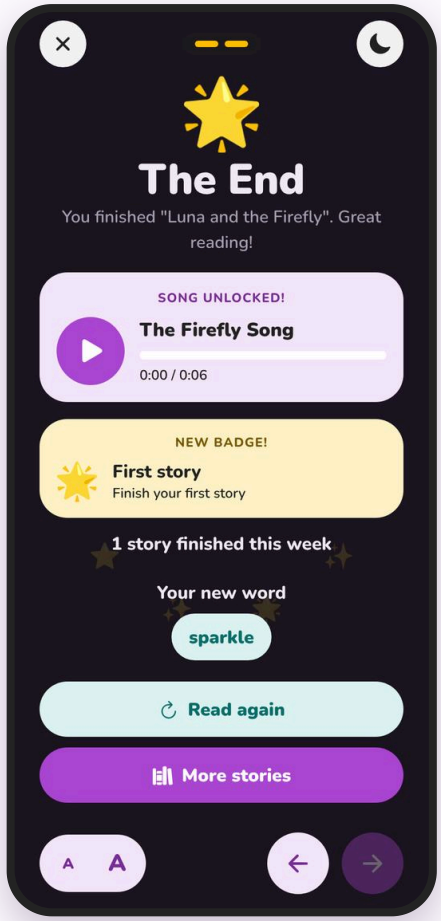

Sepia mode

A warmer page for lamp-lit reading. The mode button cycles Day, Sepia and Night.

Night mode, larger text

Night mode with the larger-text button used once, for bedtime reading.

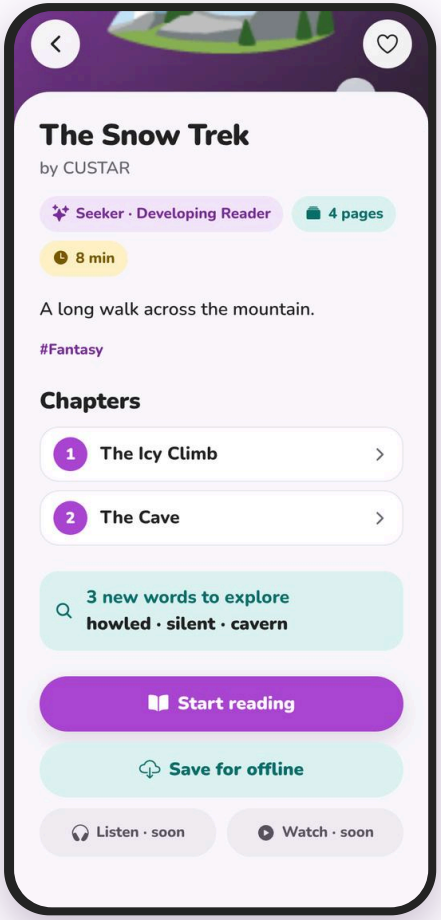

The End

Read again, or go back for more stories. Progress is saved as the child reads.

MOBILE APP

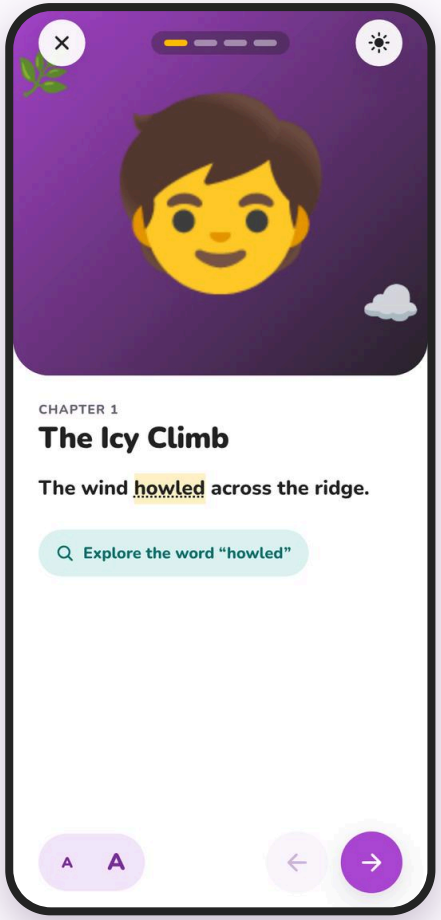

Chapters and long pages

A book can have chapters. The story page lists them and the reader can jump between them. Long pages scroll.

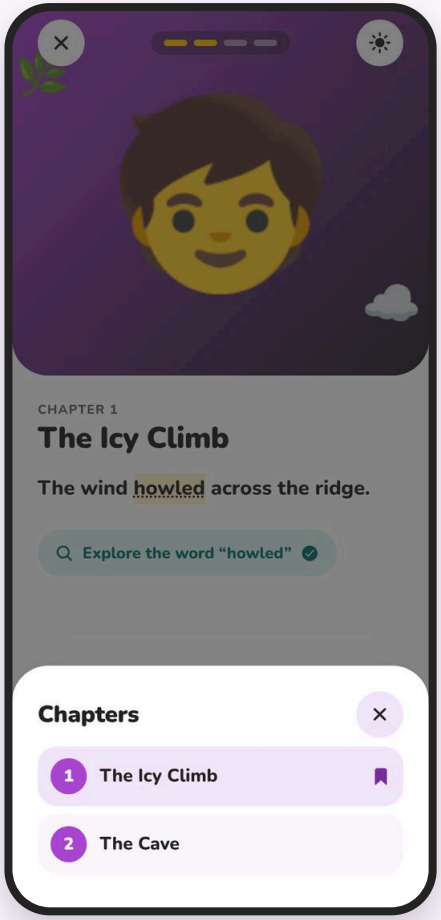

Story page

The chapter list (tap one to start there) and the new words to explore.

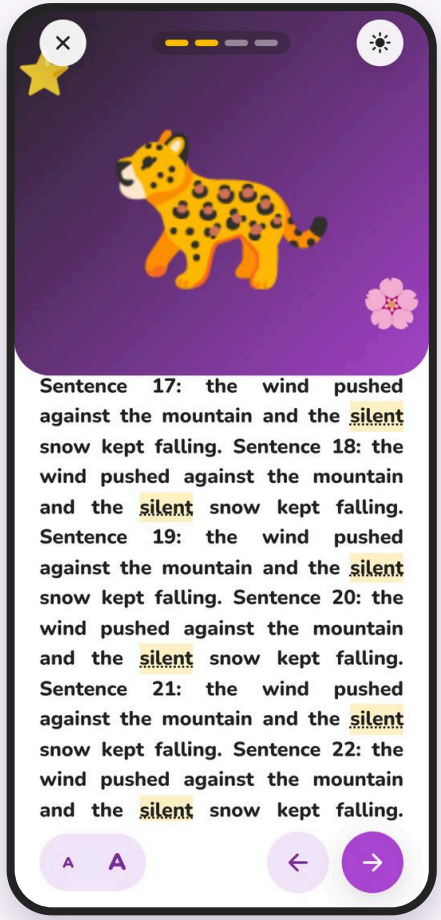

In the reader

The chapter heading sits above the text. The new word glows and can be tapped.

Chapter list

Tap the chapter heading to jump to any chapter.

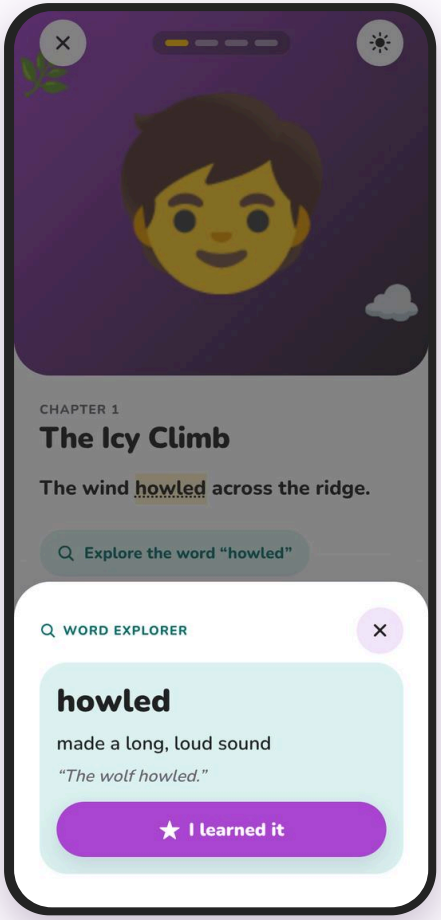

Long pages scroll

A page with a lot of text scrolls under the picture, and the last line stays clear of the buttons.

MOBILE APP

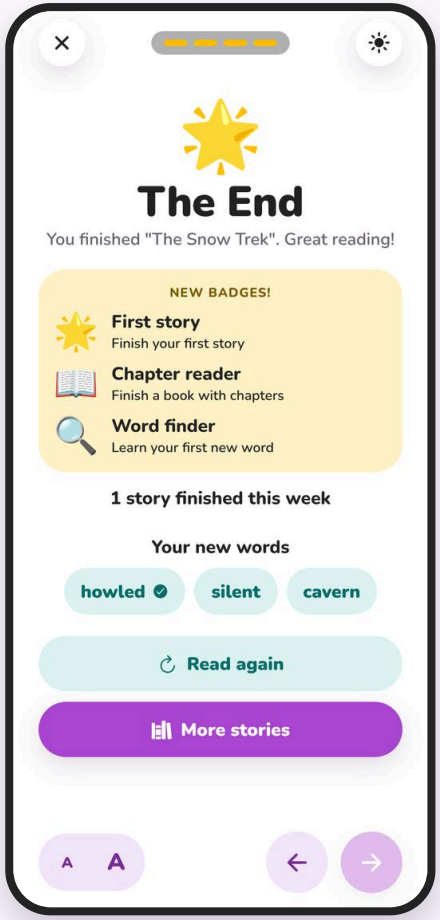

Word Explorer, badges and rewards

Spark stories have one new word and Seeker stories have three. Badges and the word garden are worked out on the device, with nothing to download.

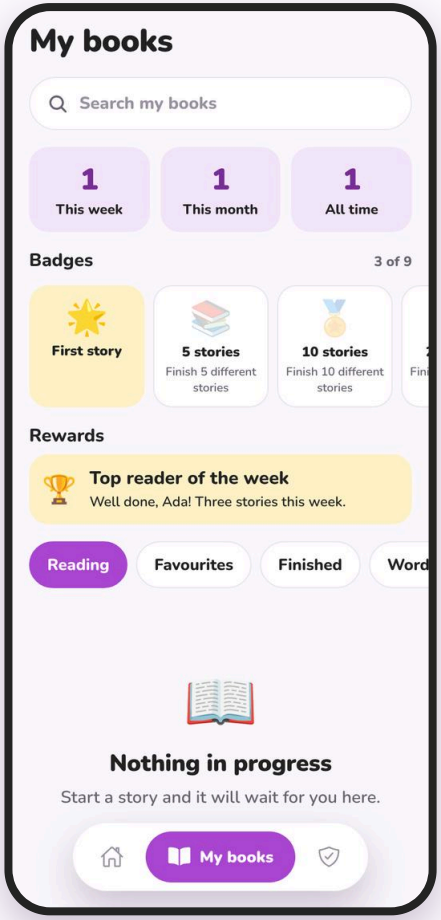

Word Explorer

The meaning and an example sentence. "I learned it" saves the word.

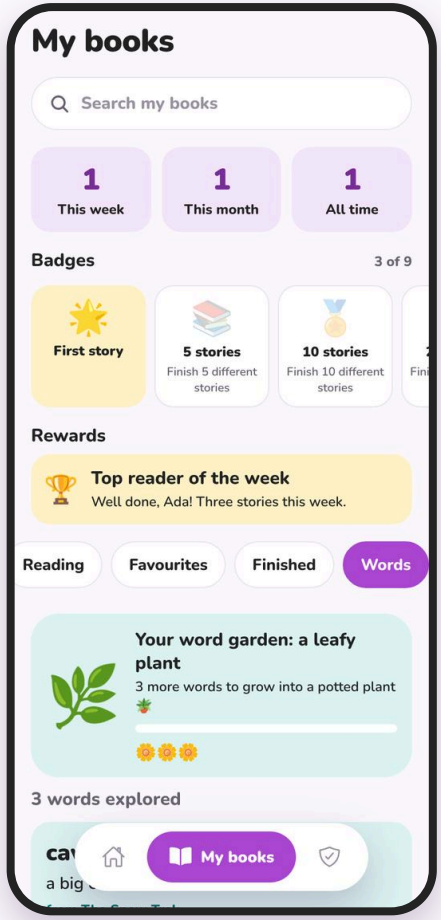

The End

A one-time star burst (skipped when the device asks for less motion), a "New badges!" card, the new words and this week's count.

Counts, badges and rewards

Stories finished this week, this month and all time, nine milestone badges, and rewards given by the Genova team.

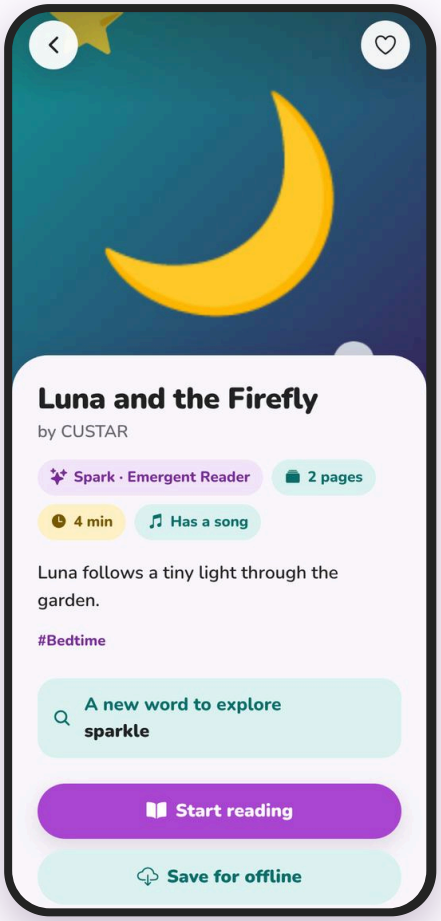

Word garden

The Words shelf grows a plant as words are learned: seed, sprout, leafy plant, flower, sunflower, tree.

MOBILE APP

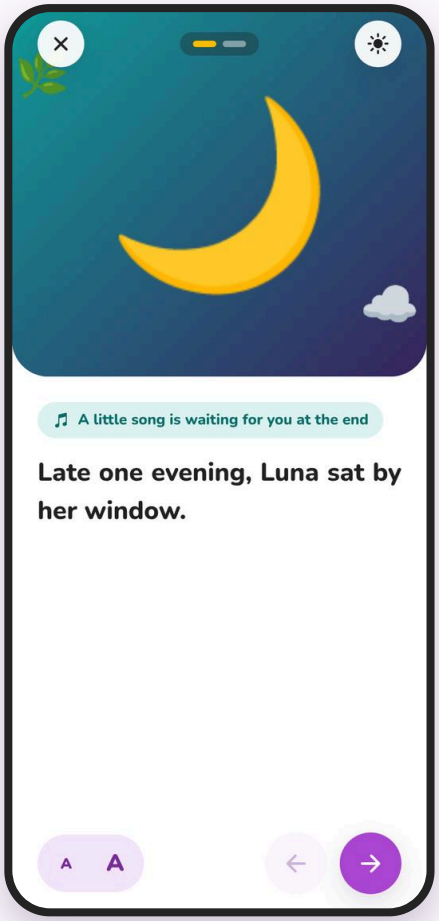

A song after the story (1 of 2)

A story can have one song. Friendly hints while reading say a song is waiting; it unlocks on The End and plays only when the child taps it. It loads while they read, so there is no wait.

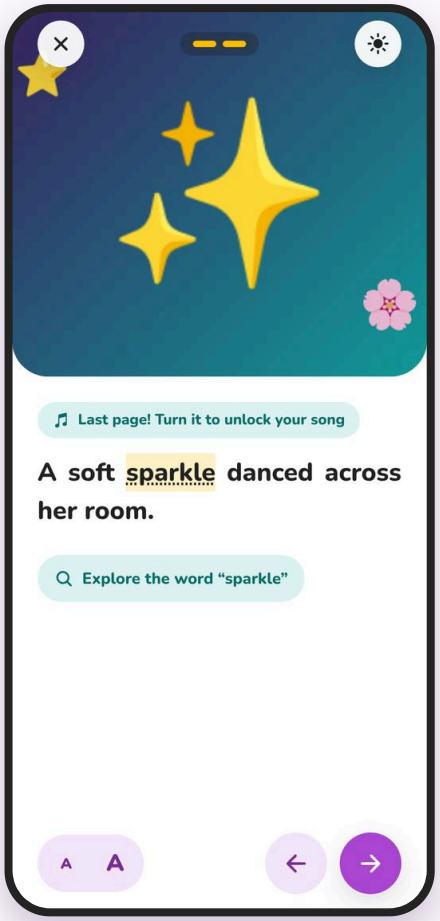

Story page

A "Has a song" fact tells the child there is a reward at the end.

Hint on the first page

A small note: a little song is waiting at the end. Hints appear on only a few pages, so they stay a treat.

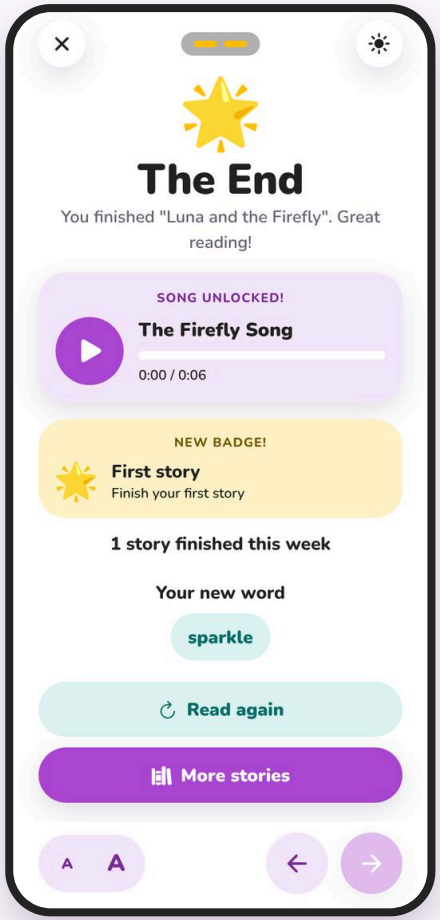

Hint on the last page

Turn the page to unlock the song.

MOBILE APP

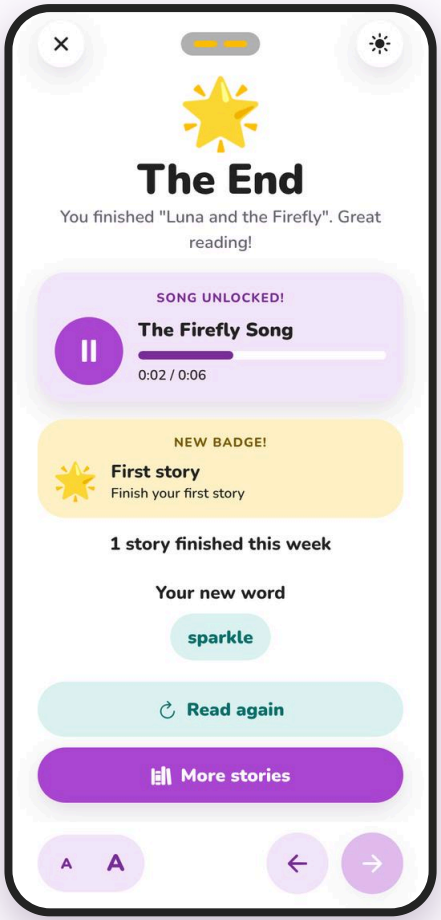

A song after the story (2 of 2)

A story can have one song. Friendly hints while reading say a song is waiting; it unlocks on The End and plays only when the child taps it. It loads while they read, so there is no wait.

Song unlocked

The End shows the song with a big play button. It never starts by itself.

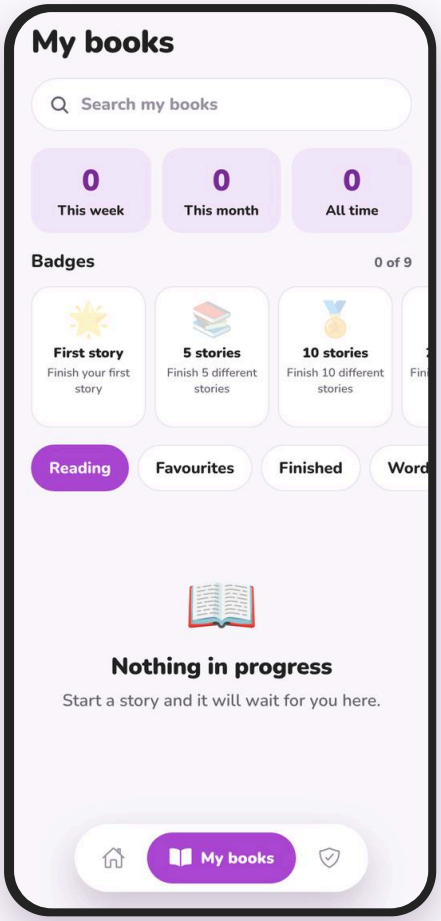

Playing

Play and pause, a progress bar and the time. It stops when the child goes back a page or closes the story.

MOBILE APP

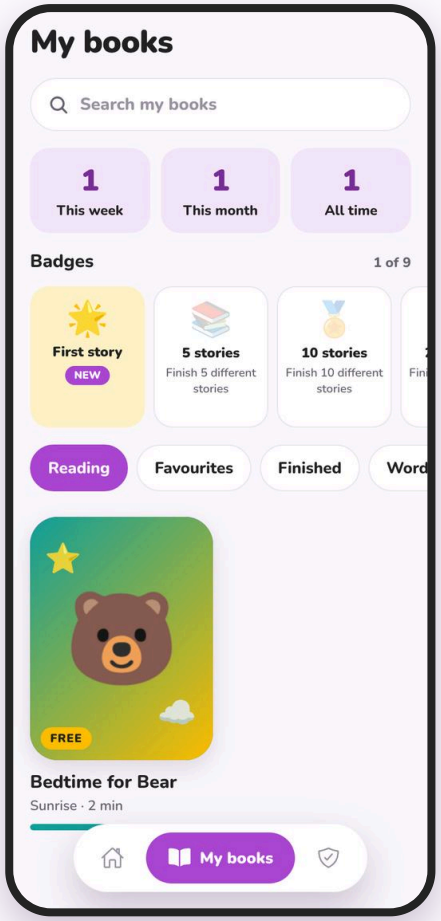

My books

A personal shelf for every reader on the device, with search.

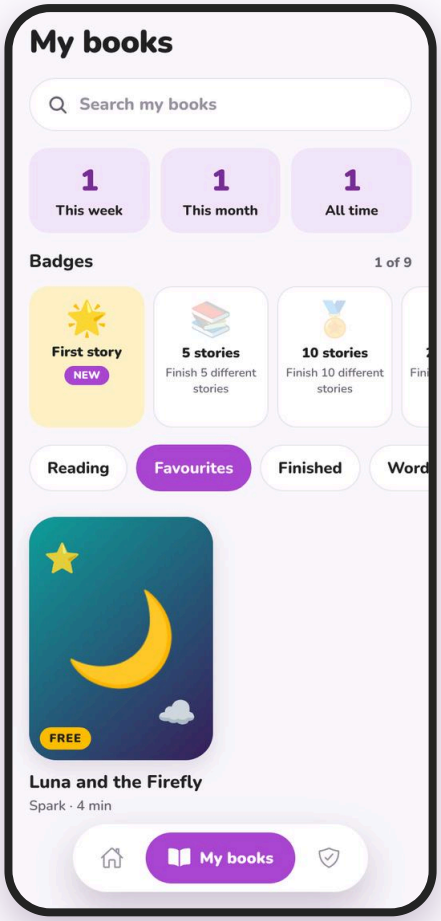

Empty state

Friendly empty states explain what will appear here.

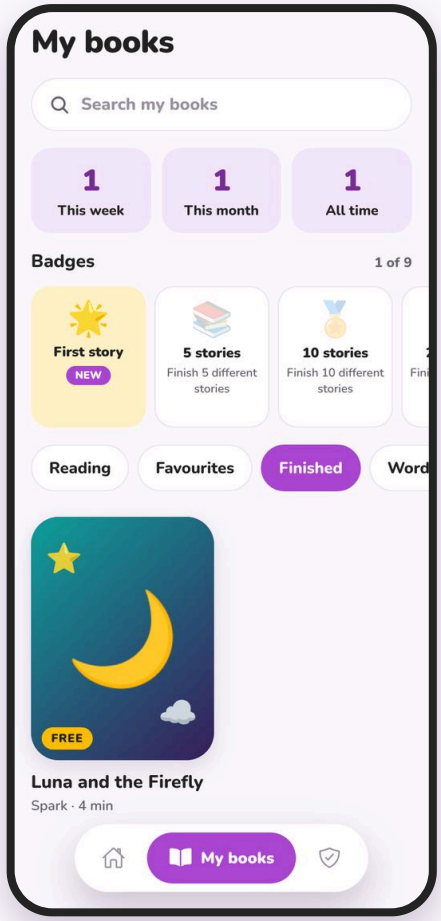

Reading

Stories in progress, with a progress bar under each cover.

Favourites

Everything the child has hearted.

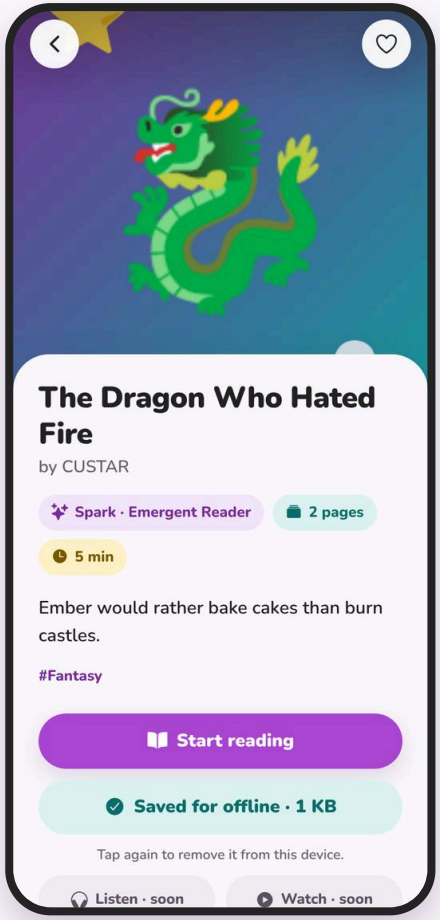

Finished

Stories read to The End.

MOBILE APP

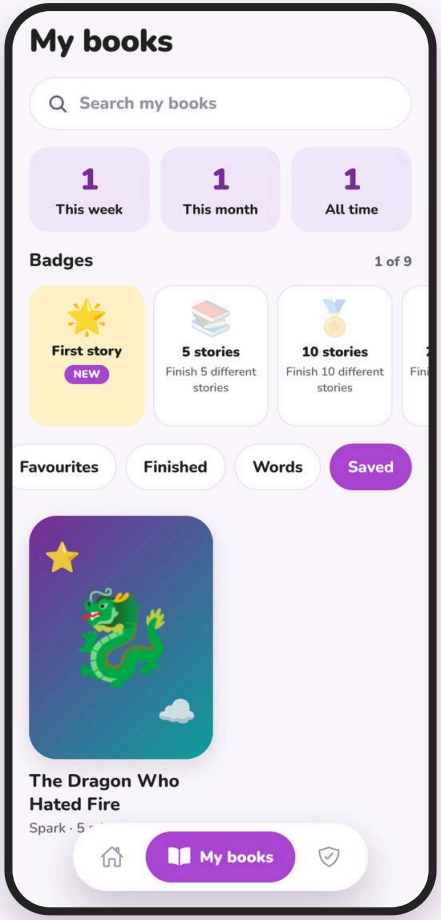

Offline reading

Save stories to the device and read them with no connection. The catalogue and Premium access are remembered too.

Saved for offline

A saved story shows a clear "Saved" state and can be removed at any time.

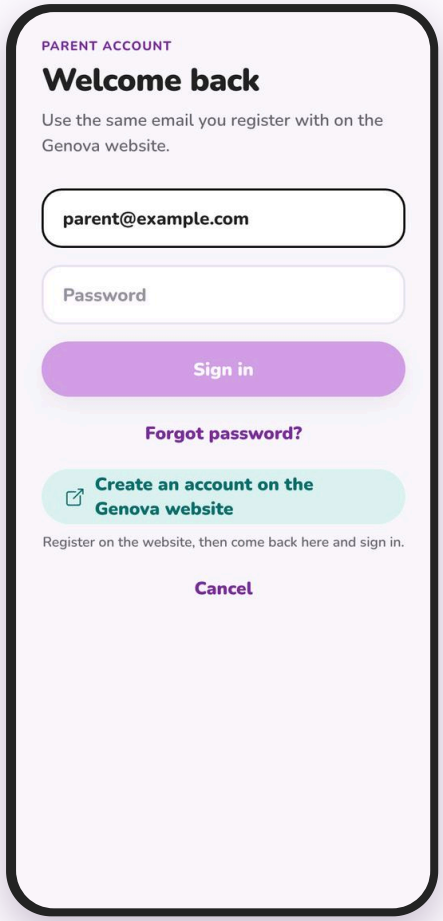

Saved tab

Saved stories come from the device, so this shelf works with no connection at all.

MOBILE APP

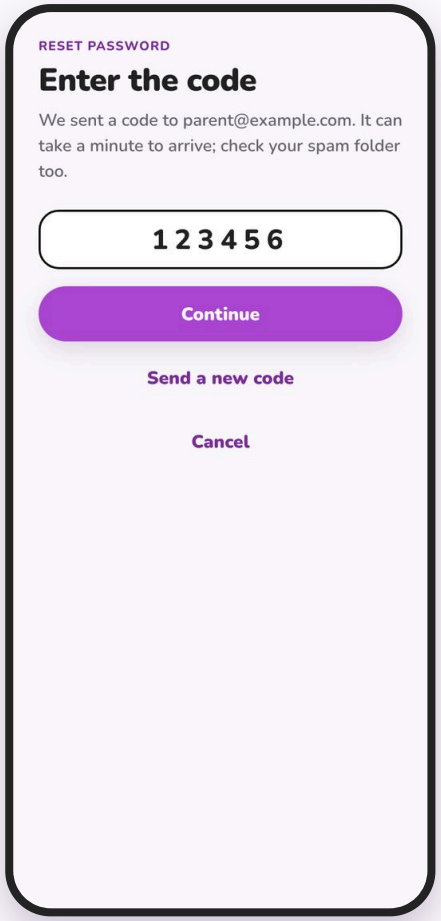

Sign in and password reset

Parents use the same email they register with on the Genova website.

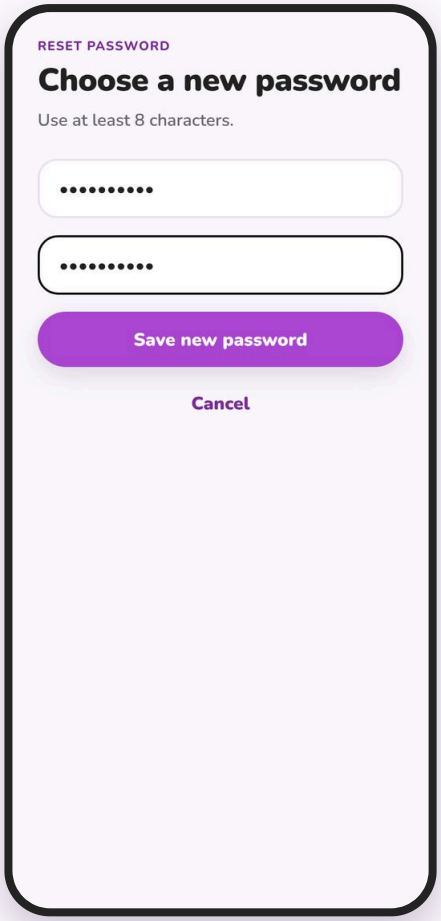

Parent sign-in

"Use the same email you register with on the Genova website." Create an account opens the website; Forgot password starts a reset.

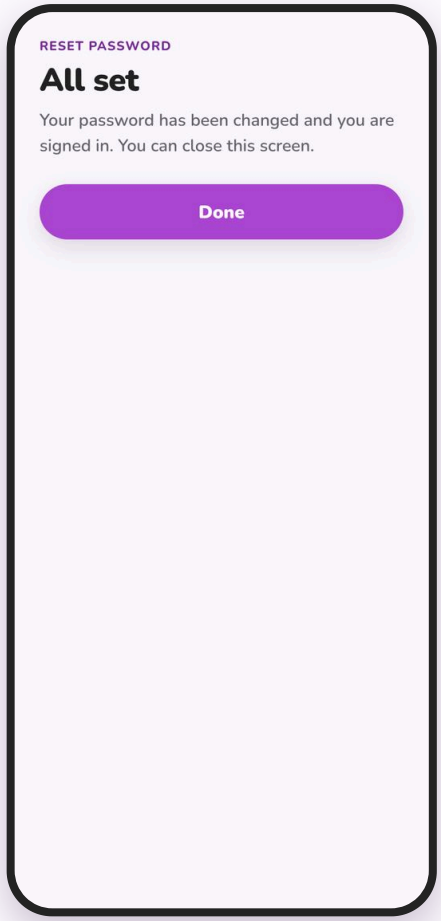

Enter the code

We email a 6-digit code. Nothing sensitive travels through a link.

New password

Choose and repeat a new password.

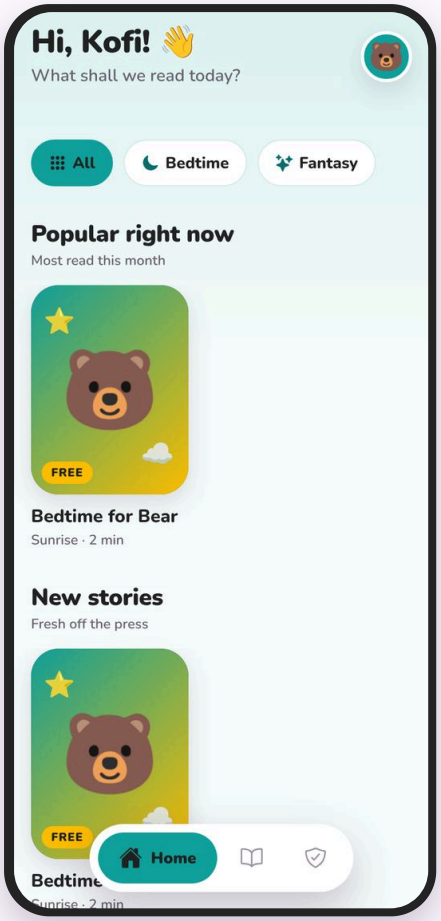

All set

The parent is signed in with the new password.

MOBILE APP

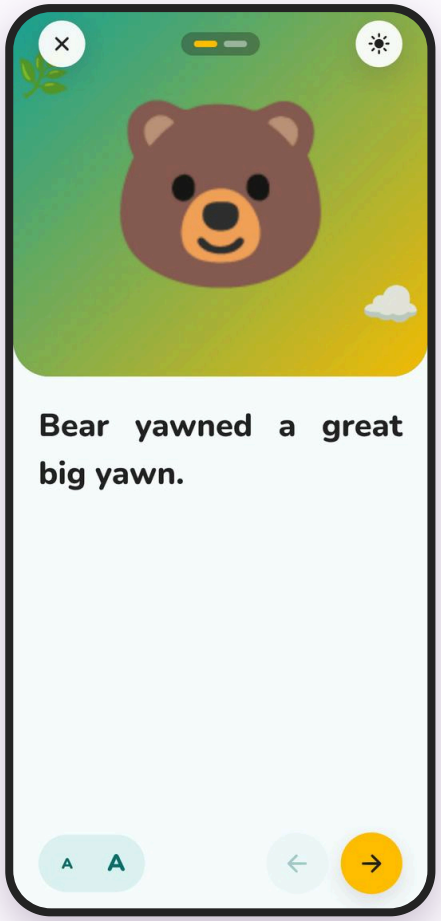

Themes and reader modes

Purple is the default, with purple main buttons. Parents can choose Teal in Grown-ups, which has amber main buttons. Each theme has its own Day, Sepia and Night modes in the reader.

Teal theme: Home

Teal accents for selection, tabs and cards, with amber main buttons.

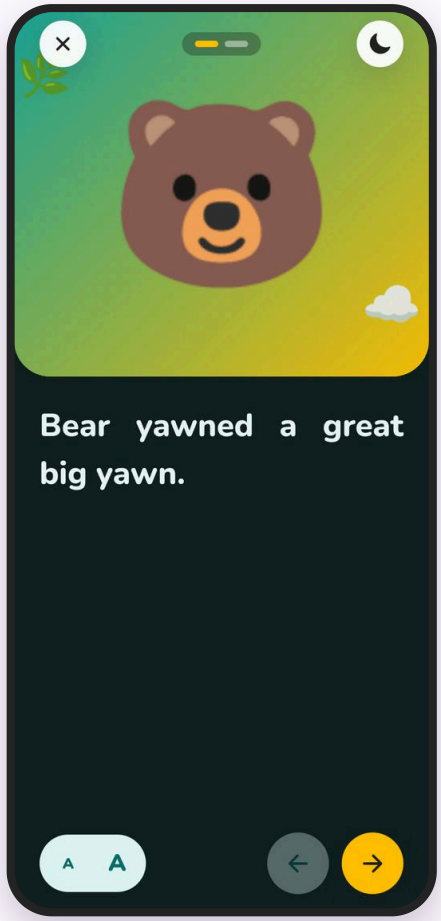

Teal: Day

A bright page. The next-page button is the amber main action.

Teal: Sepia

A warm page for lamp-lit reading.

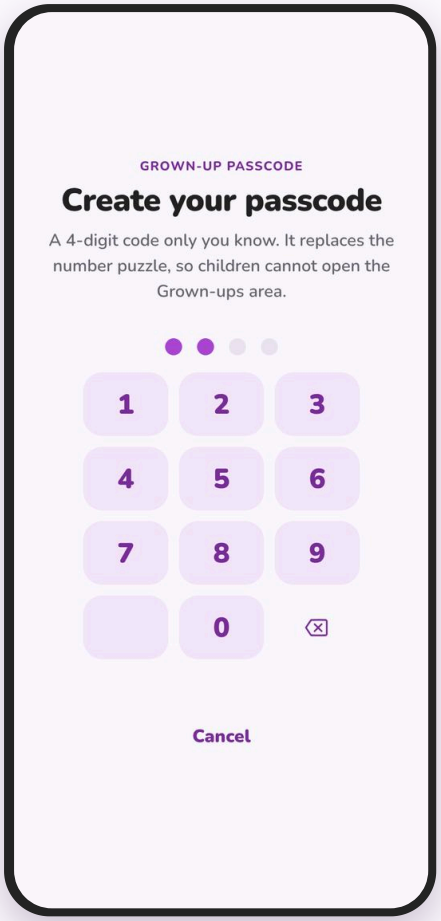

Teal: Night

Deep teal for bedtime. The reader remembers the last mode.

MOBILE APP

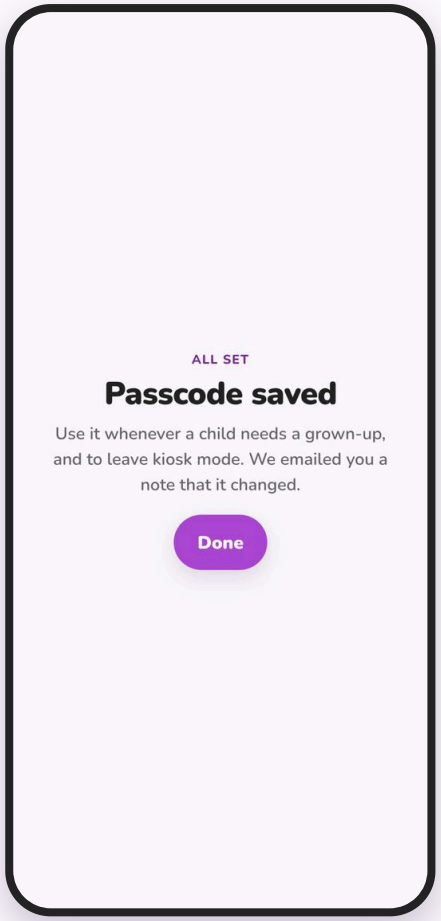

Passcode and kiosk mode

A parent with an account creates a 4-digit passcode. It replaces the number puzzle and is the only way out of kiosk mode.

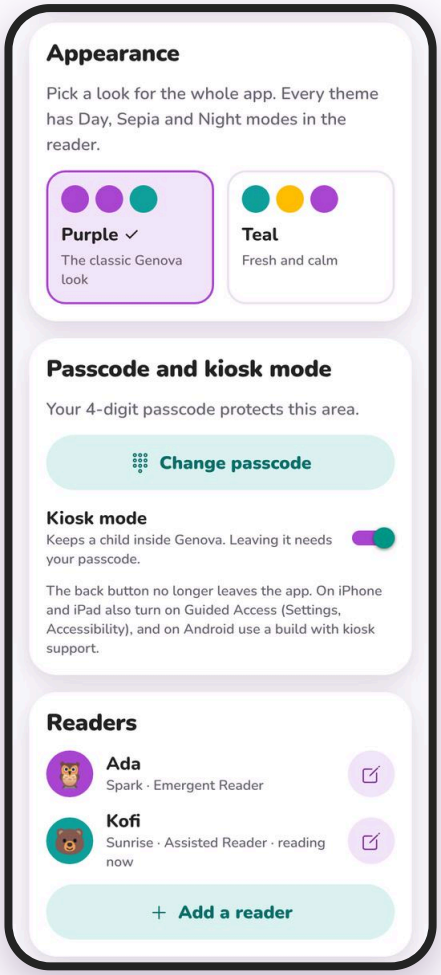

Create a passcode

Offered right after sign-in, or any time from Grown-ups.

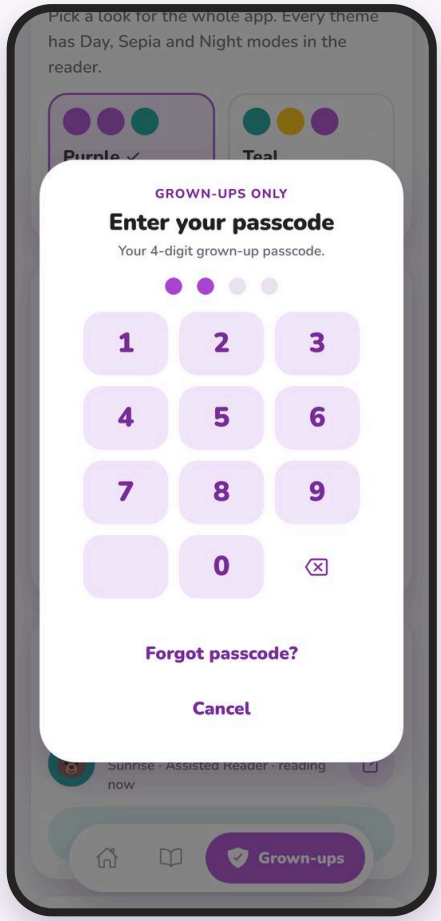

Saved

Only a salted hash is stored. We email a note that it changed.

Appearance, passcode, kiosk

The theme picker, the passcode and the Kiosk mode switch, with plain-language notes.

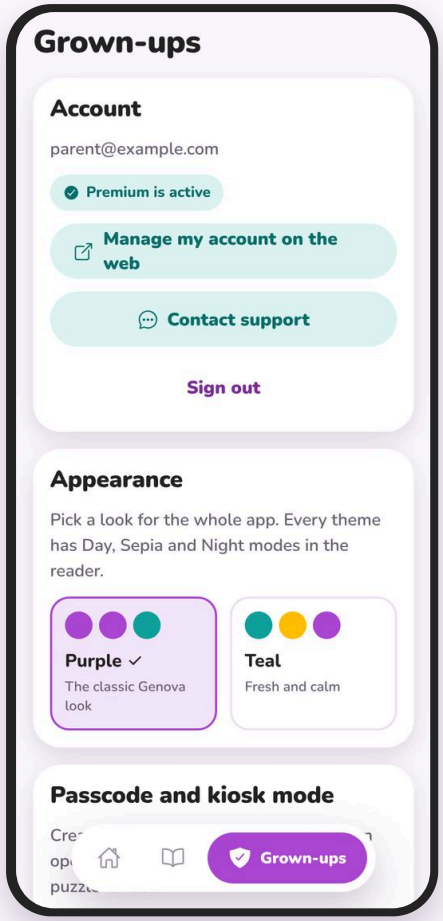

Passcode gate

Asked every time a child needs a grown-up, and again to leave kiosk mode. Five wrong tries lock it for a minute.

MOBILE APP

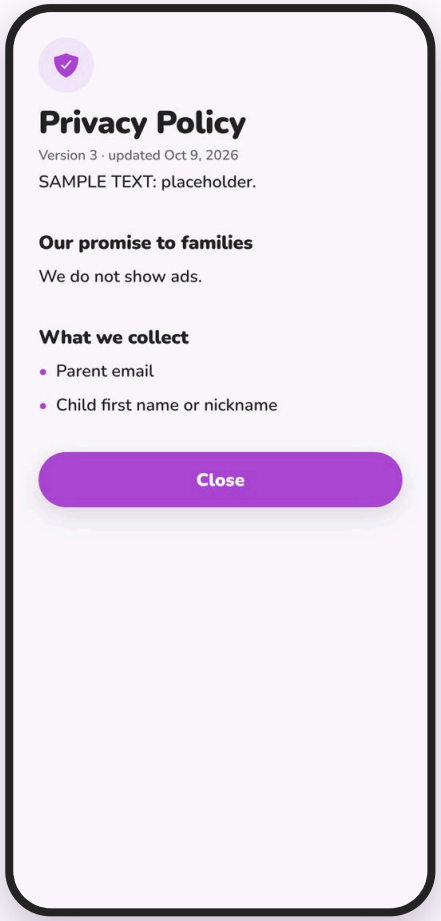

Readers and the Grown-ups area

Several children can share one device. Parents see their plan, readers, downloads and the privacy policy.

Premium active

Account status, Manage on the web, readers, offline storage and privacy.

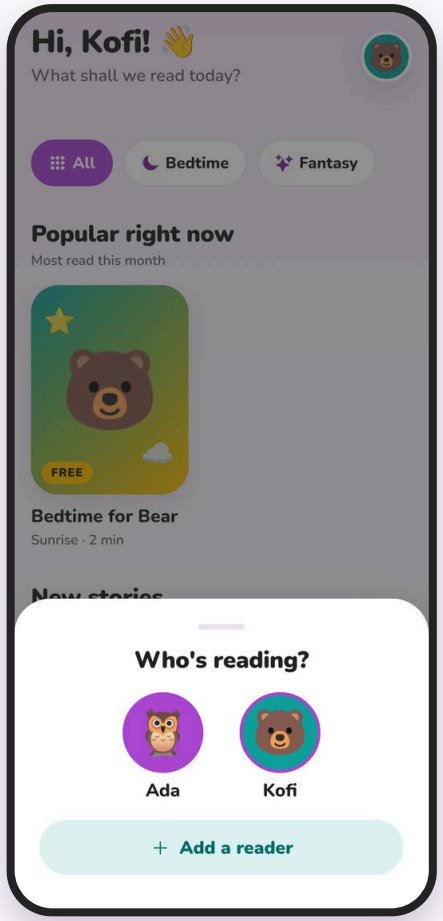

Privacy policy

Opens as a pop-up. CUSTAR edits the text in the admin dashboard, and a saved copy is kept for offline reading.

Edit reader

Change name, buddy or reading level.

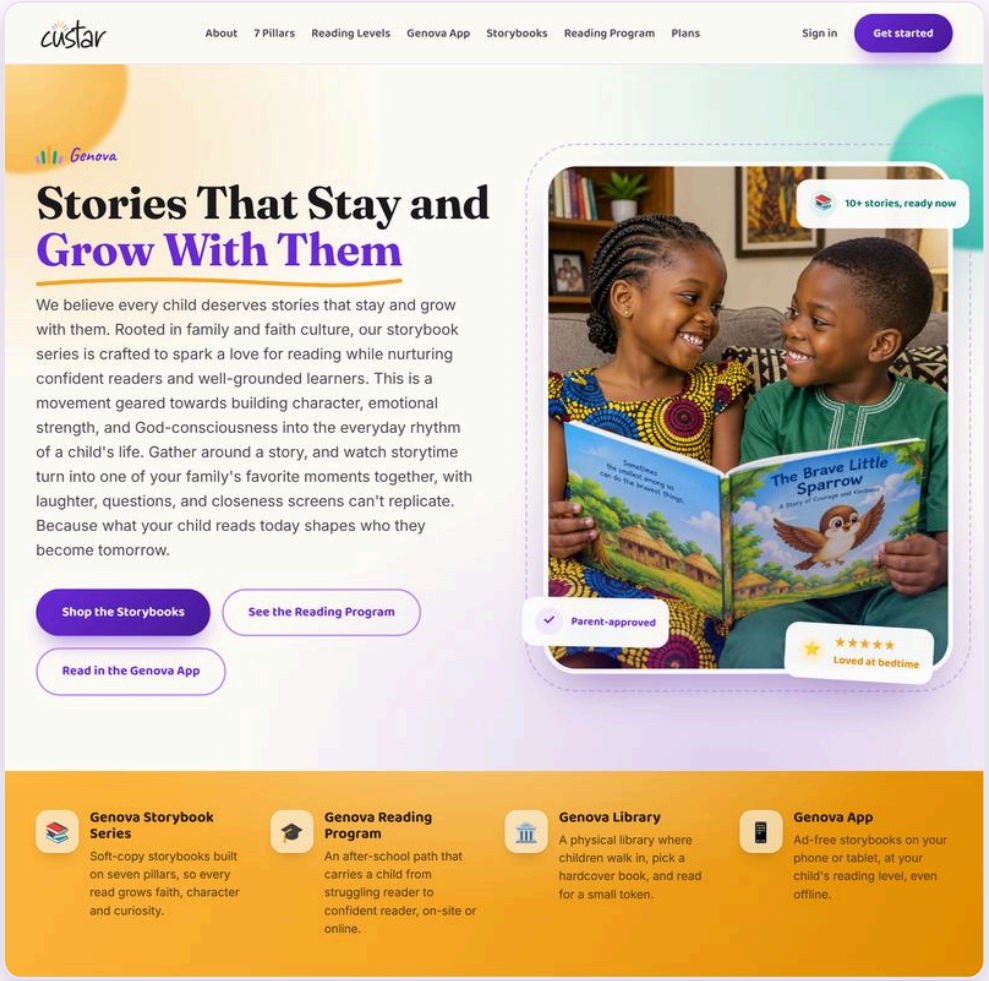

Switch reader

A bottom sheet from the avatar on Home, behind the parental gate.

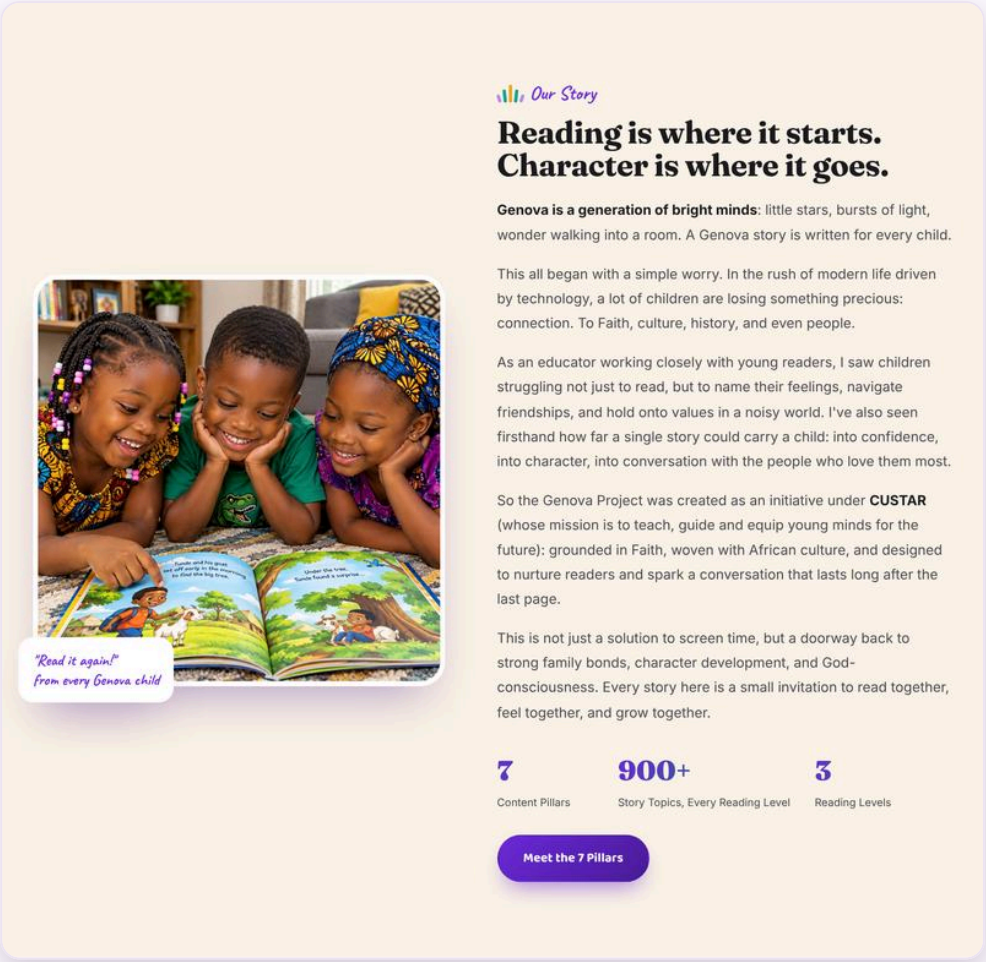

WEBSITE

Landing: welcome

The CUSTAR landing page. It opens with the Genova promise, three programmes and the Genova app, then tells the story behind it.

Header, hero and what Genova offers

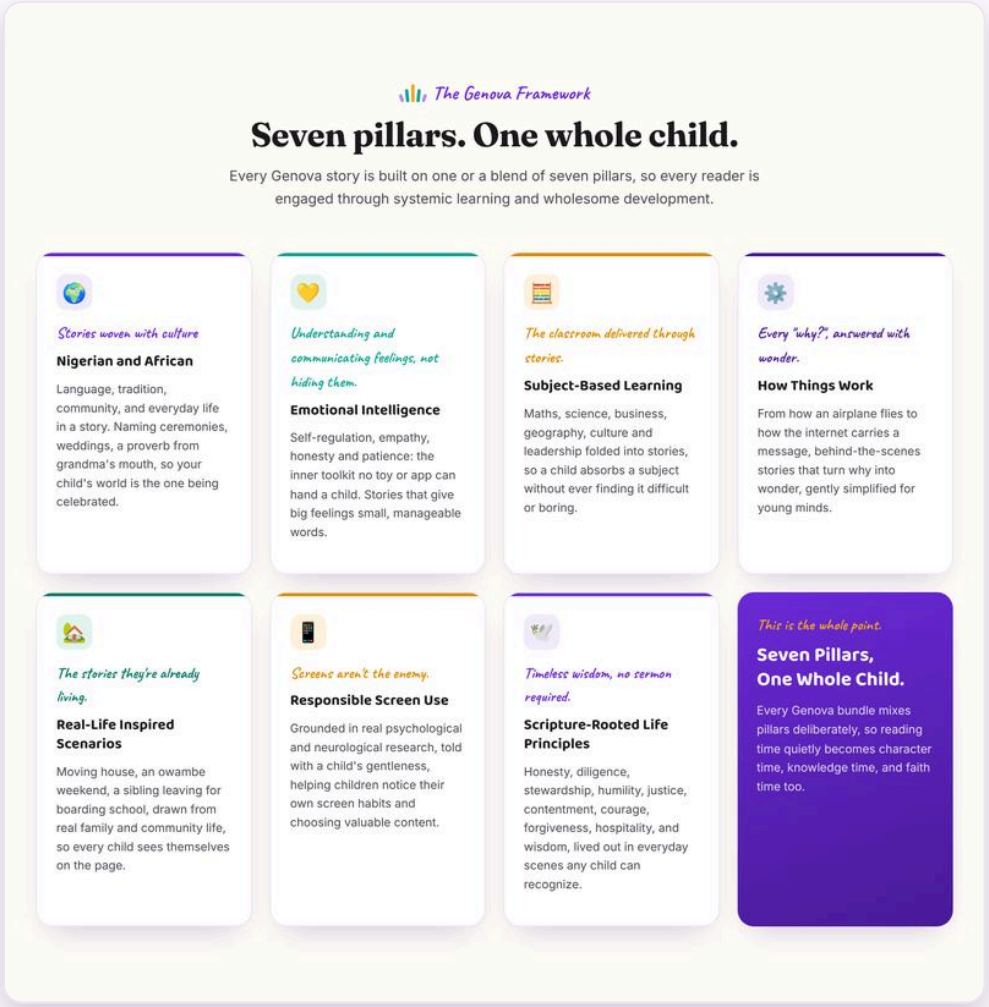

Our story

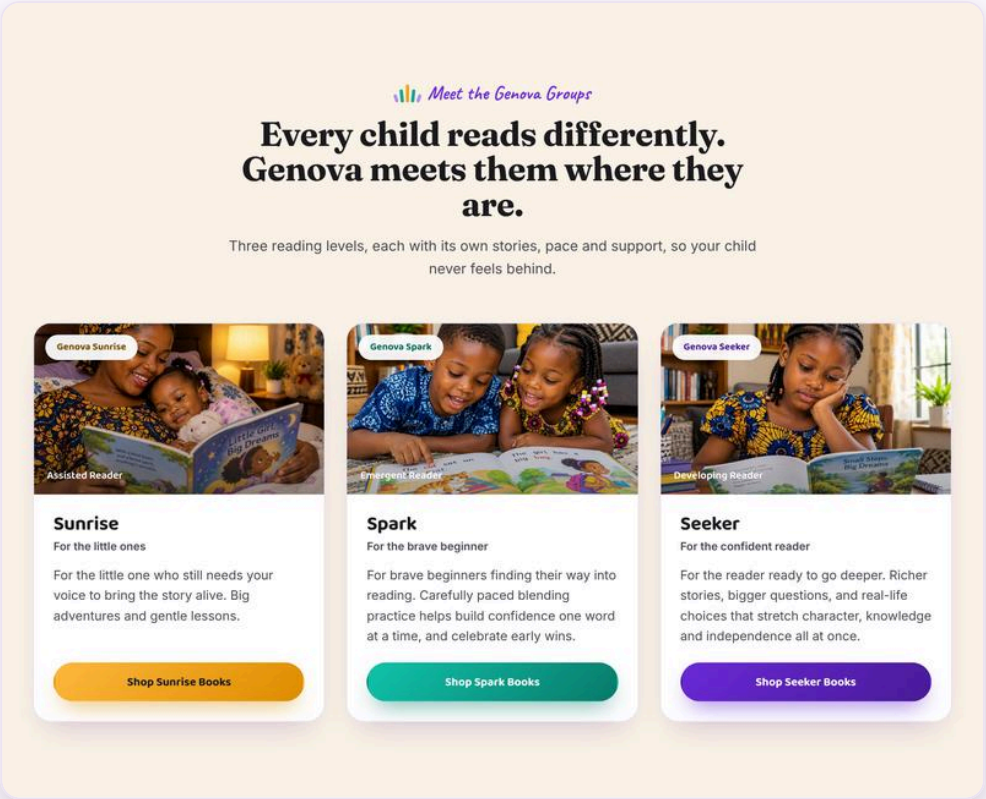

WEBSITE

Landing: pillars and reading levels

Seven pillars of whole-child development, and three reading levels: Sunrise, Spark and Seeker. Levels are named, never aged.

The seven pillars

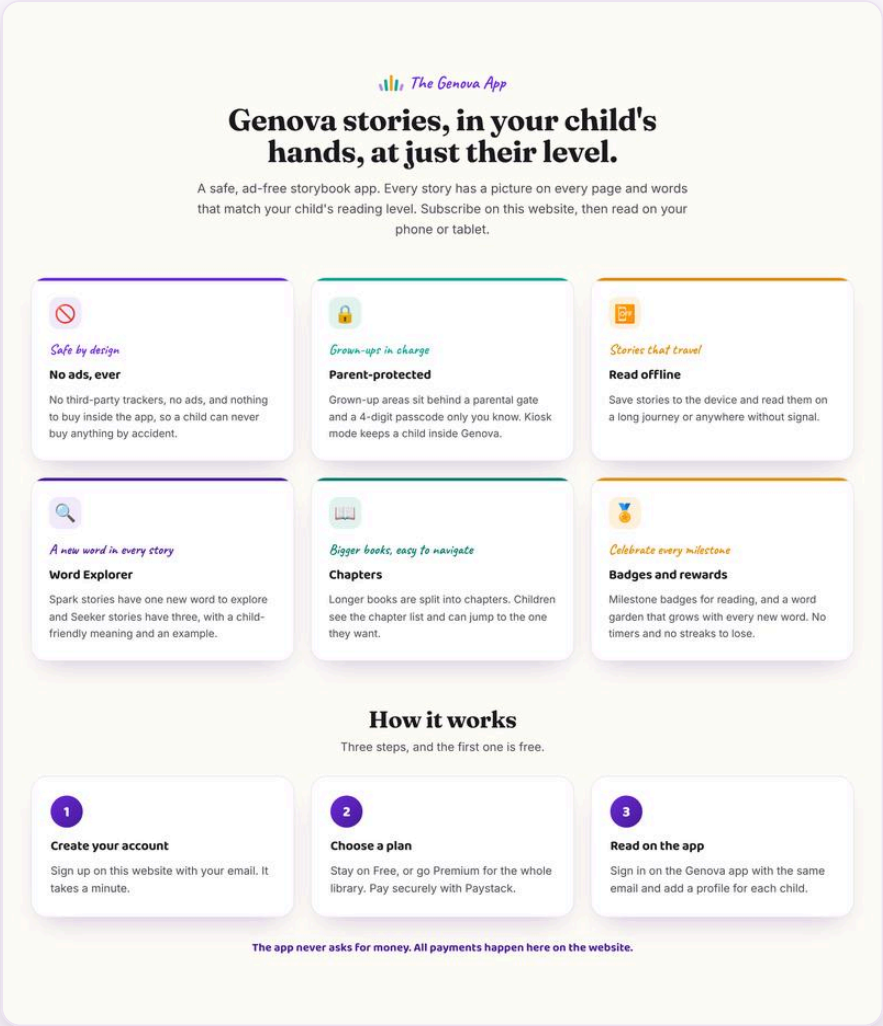

Reading levels

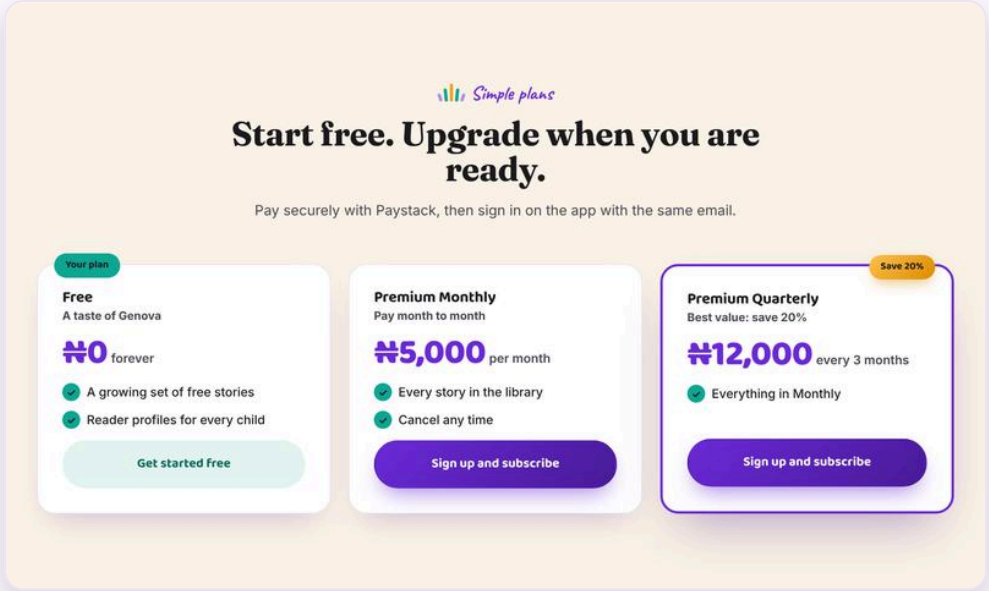

WEBSITE

Landing: the Genova app and plans (1 of 2)

The app block explains what the app offers, then live plans and the answers parents ask most. Payments happen here, never inside the app.

The Genova app

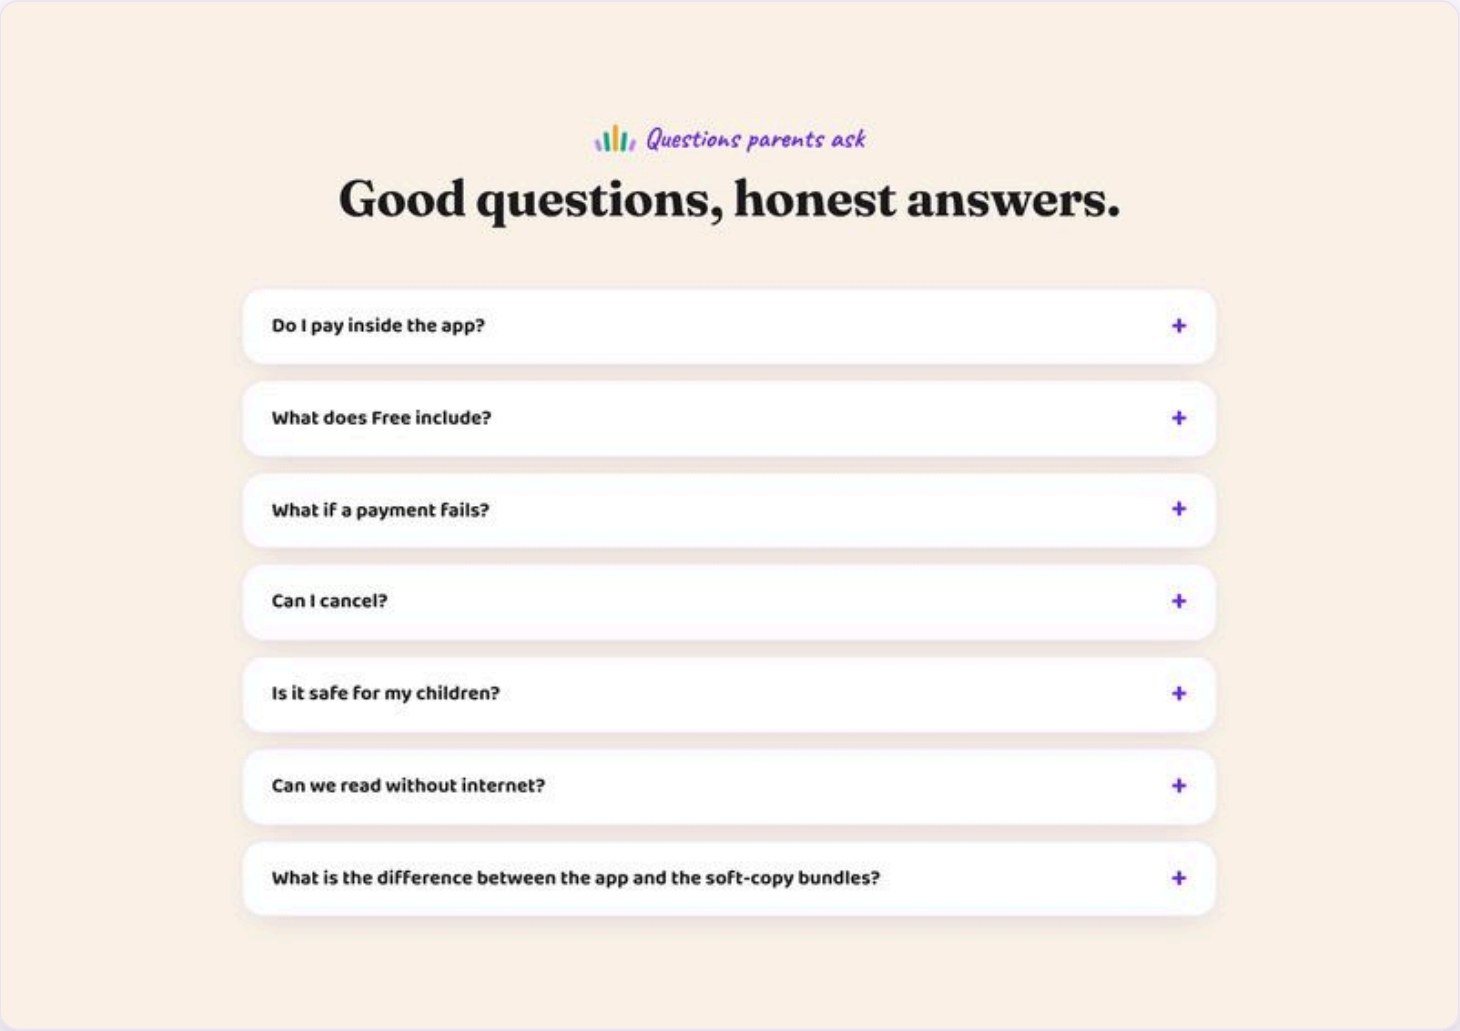

Plans (live from the database)

Editor: chapters and Word Explorer (5 of 5)

Song (1 of 2)

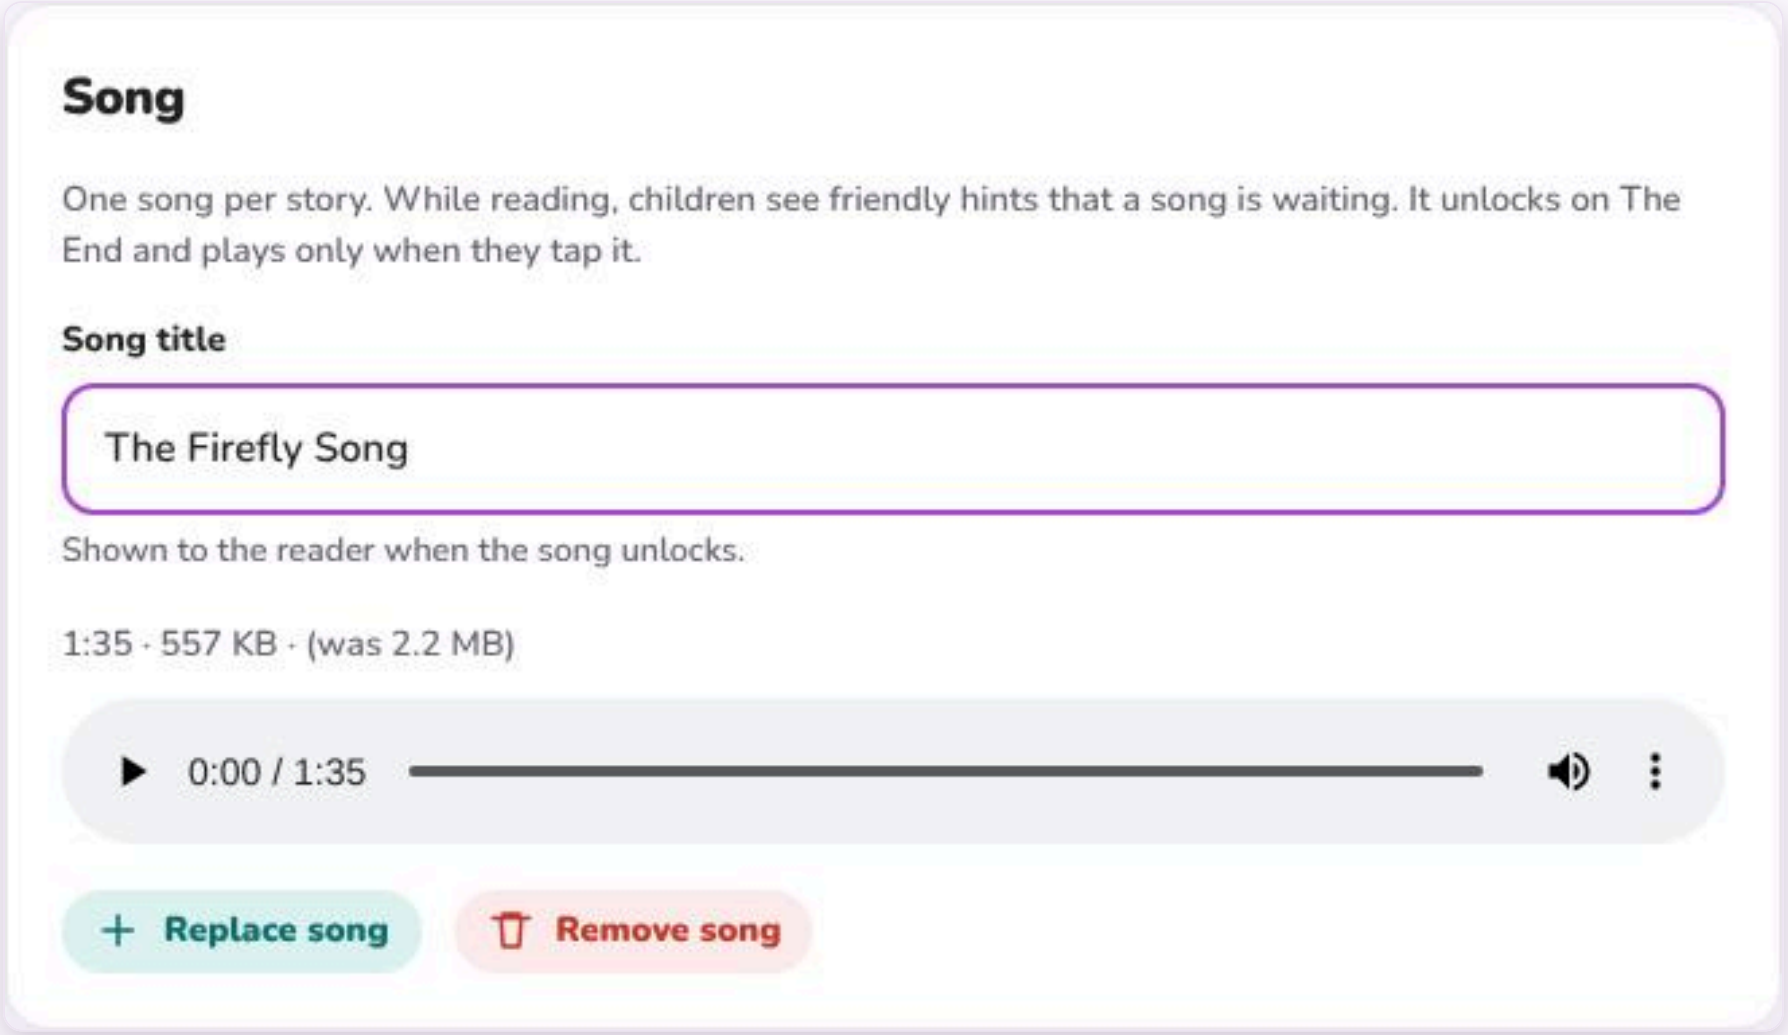

Each story can have one MP3 song. The file is made light in the browser (mono, 48 kbps, about 1 MB for 3 minutes) before it uploads, so it loads fast on a phone. The card shows the size before and after and a preview player. A song needs a title before the story can go Live.

Song card: no song yet

Song (2 of 2)

Each story can have one MP3 song. The file is made light in the browser (mono, 48 kbps, about 1 MB for 3 minutes) before it uploads, so it loads fast on a phone. The card shows the size before and after and a preview player. A song needs a title before the story can go Live.

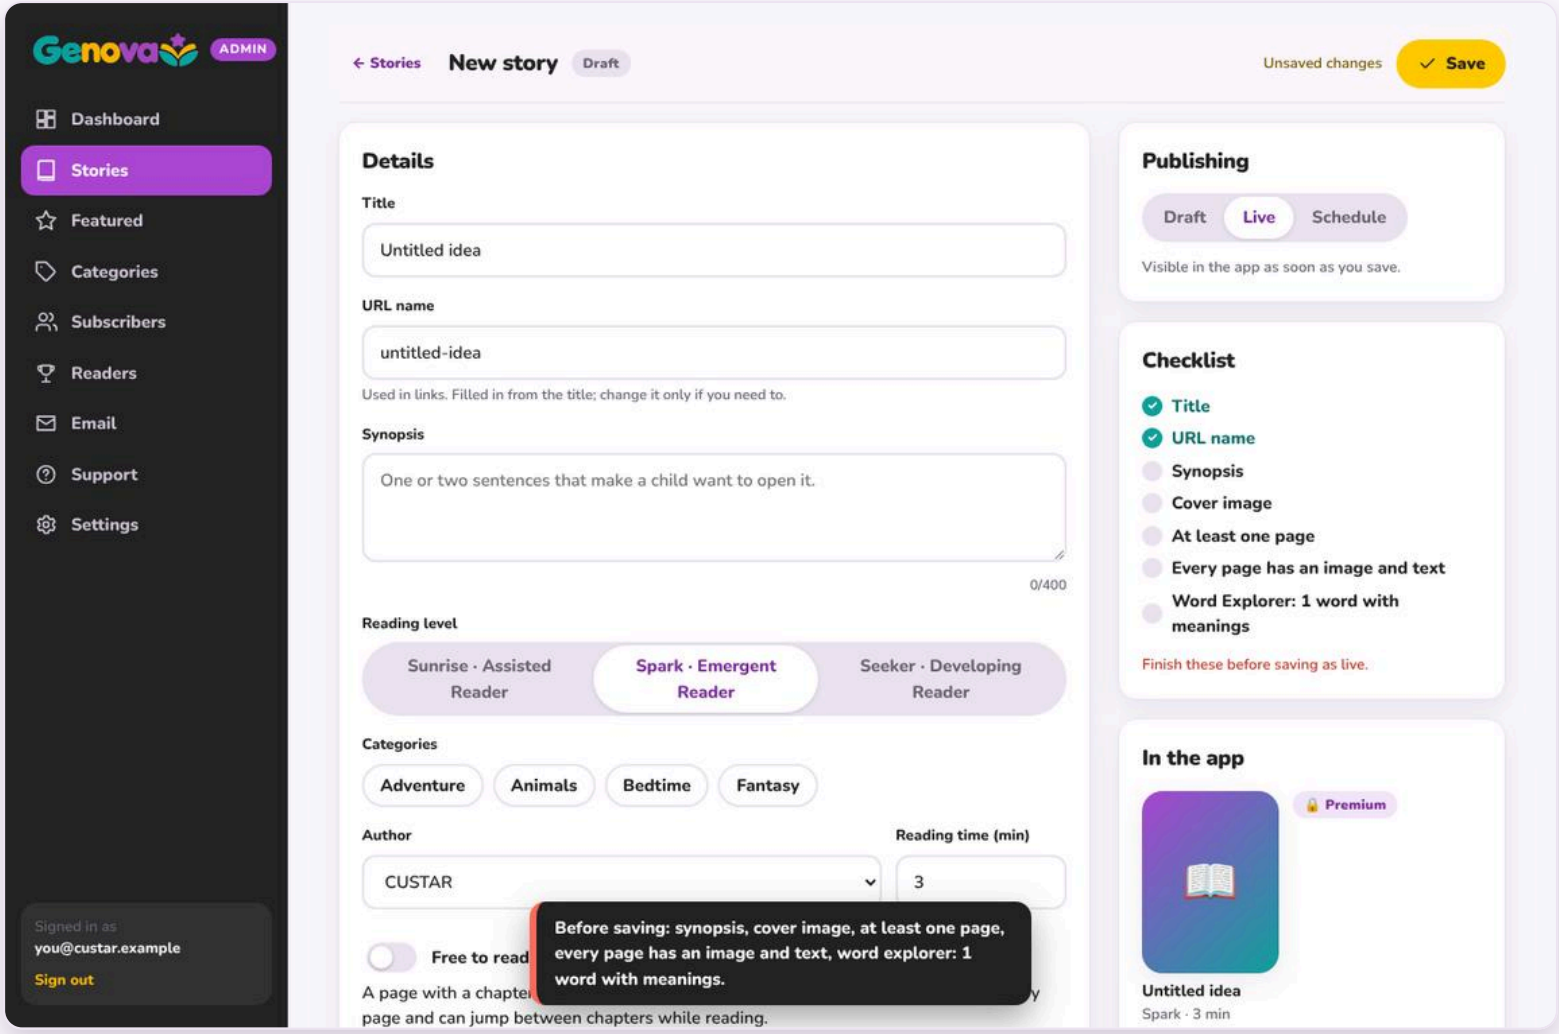

Song card: added, with preview

ADMIN DASHBOARD

Publish checklist

The checklist blocks "Live" until the story has a title, synopsis, cover, complete pages, and (when they apply) chapters, its Word Explorer words and a song title (when a song is added). Drafts can always be saved.

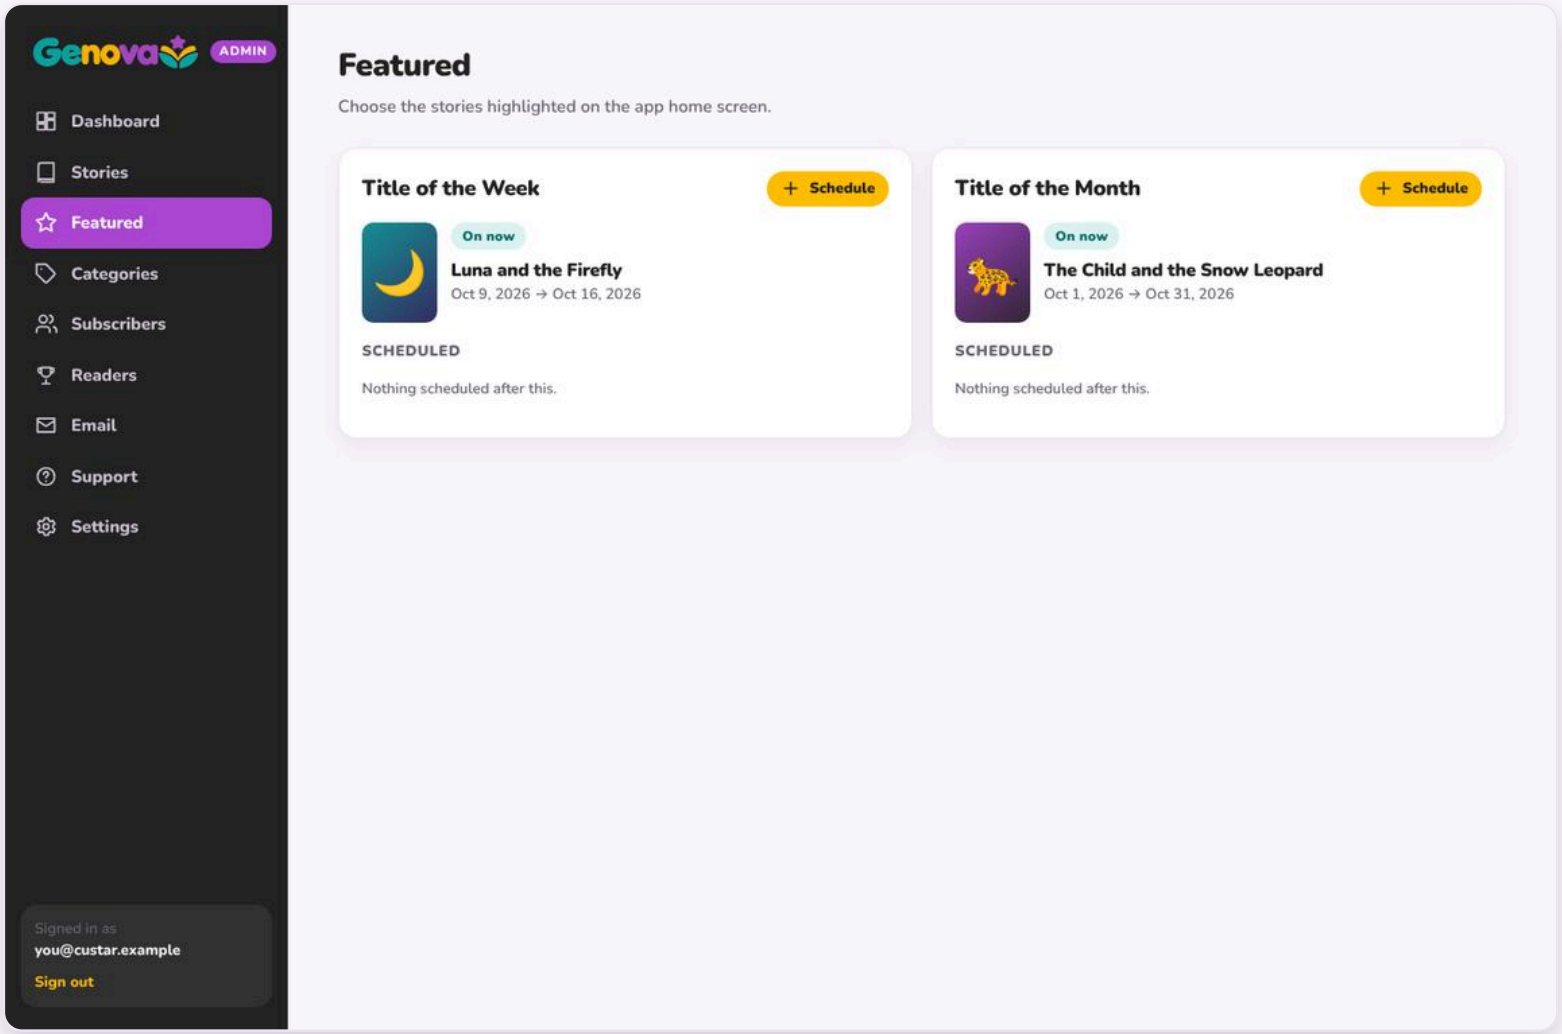

Checklist blocks an incomplete story

ADMIN DASHBOARD

Featured

Title of the Week and Title of the Month, with what is on now and what is scheduled next.

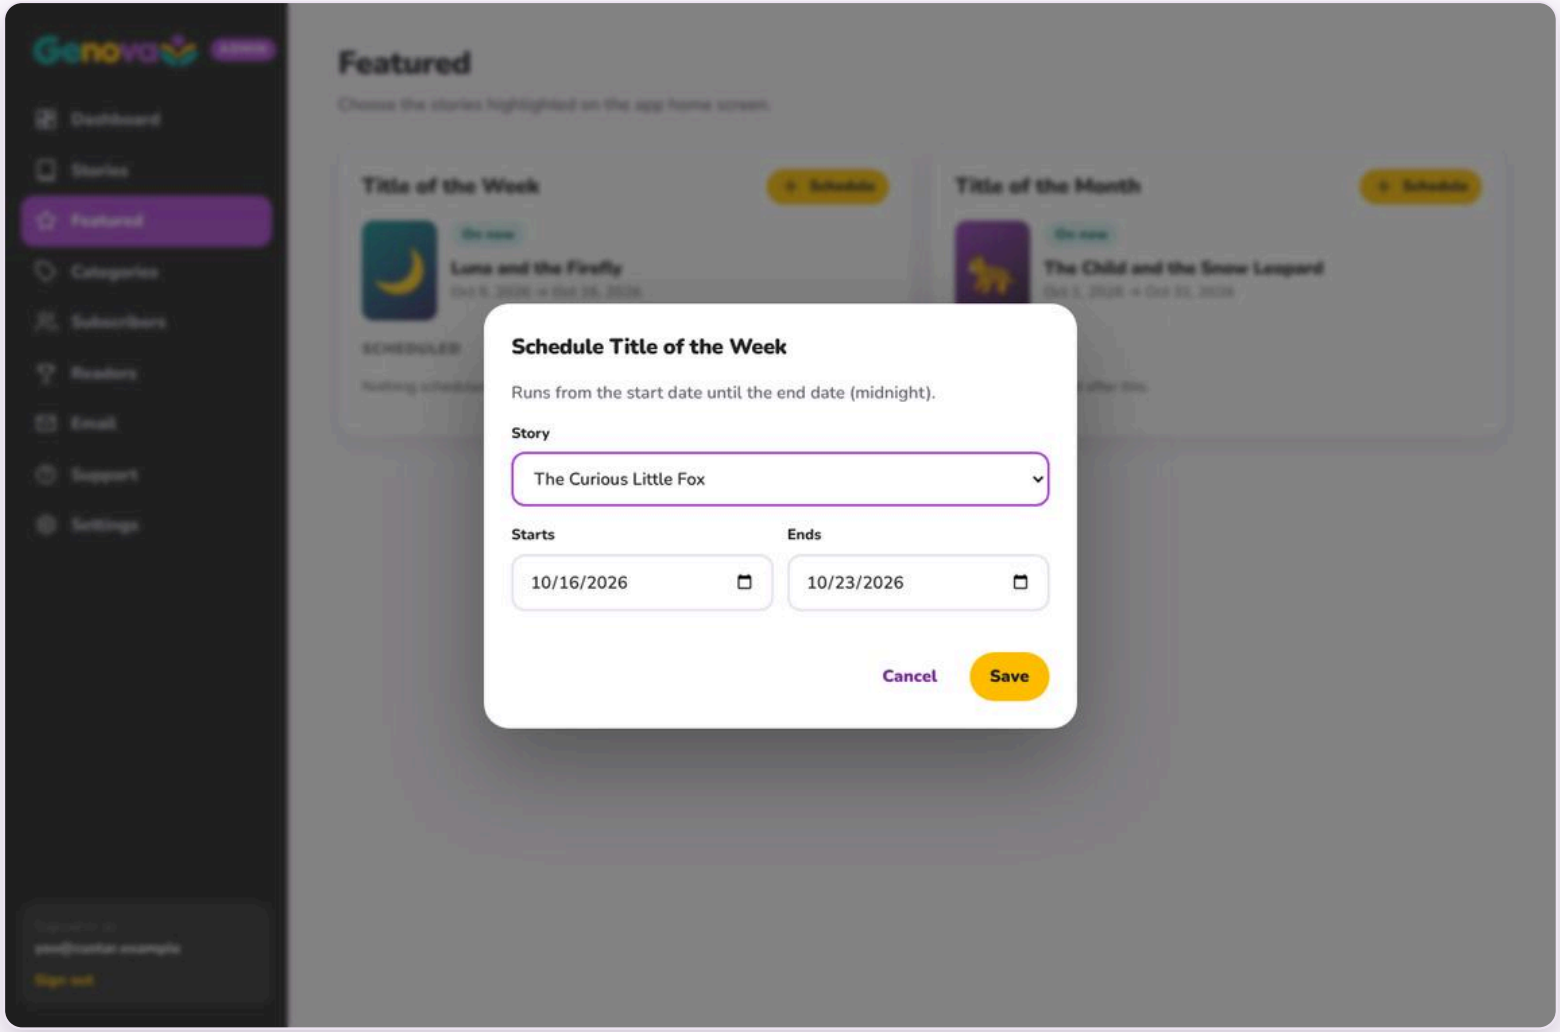

Featured slots

ADMIN DASHBOARD

Schedule a featured story

Pick a live or scheduled story and a date range. The database rejects overlapping slots of the same kind, so the home screen always has one clear winner.

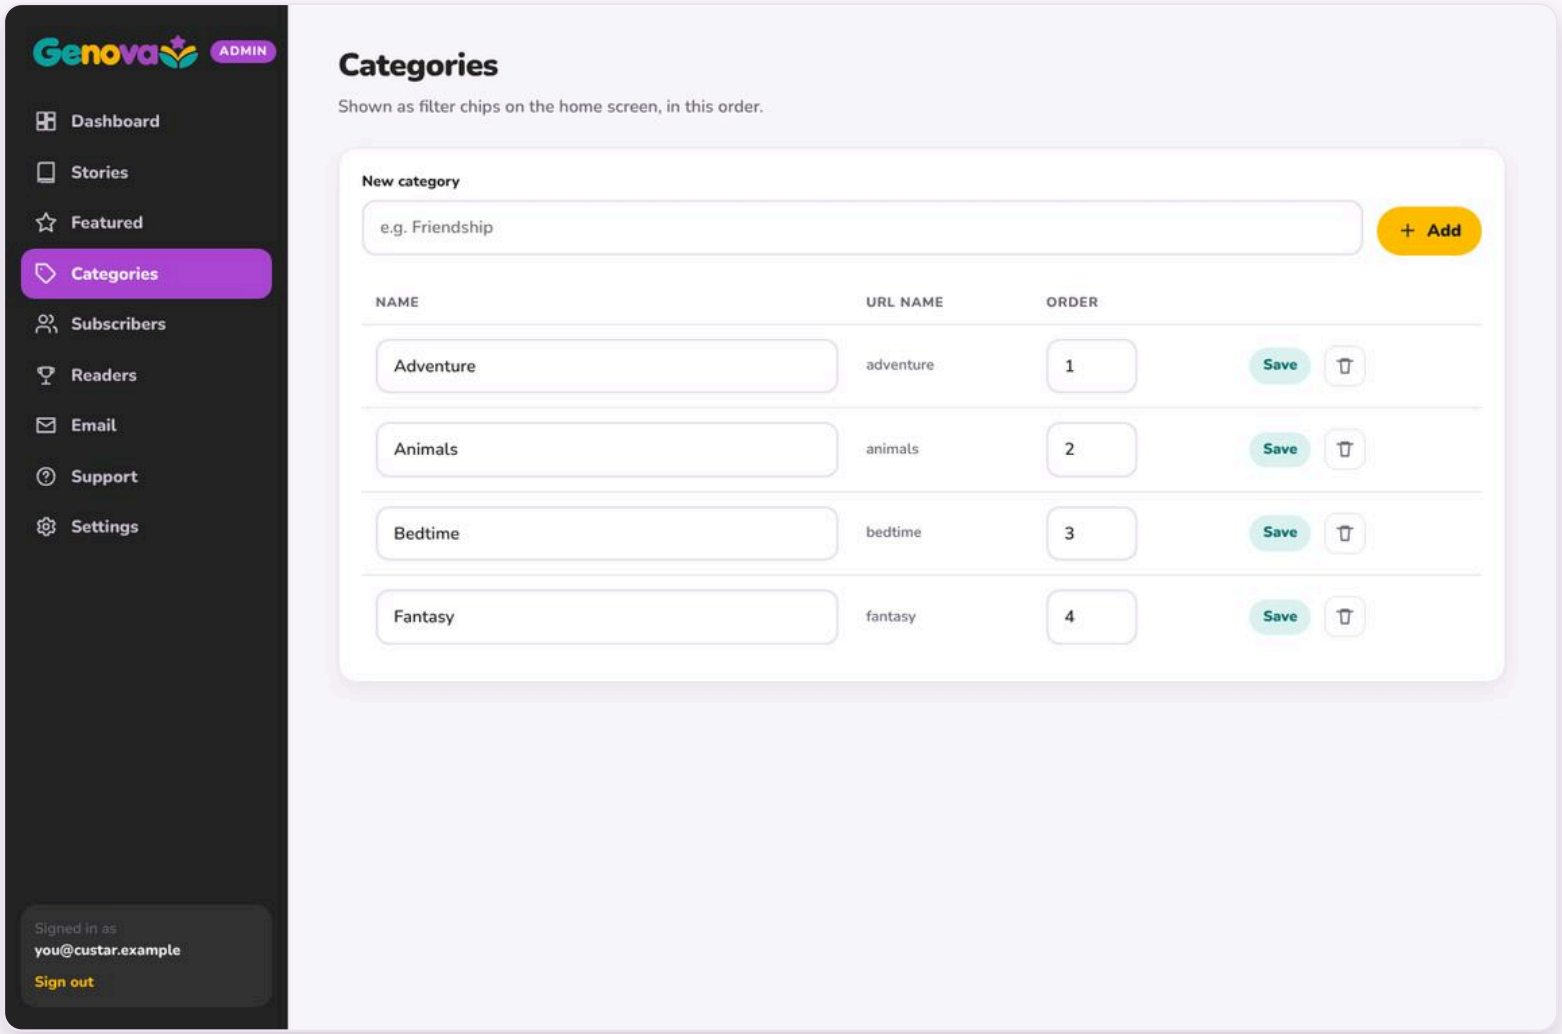

Schedule a featured story

ADMIN DASHBOARD

Categories

Rename, reorder, add and delete the category chips shown on the app home screen.

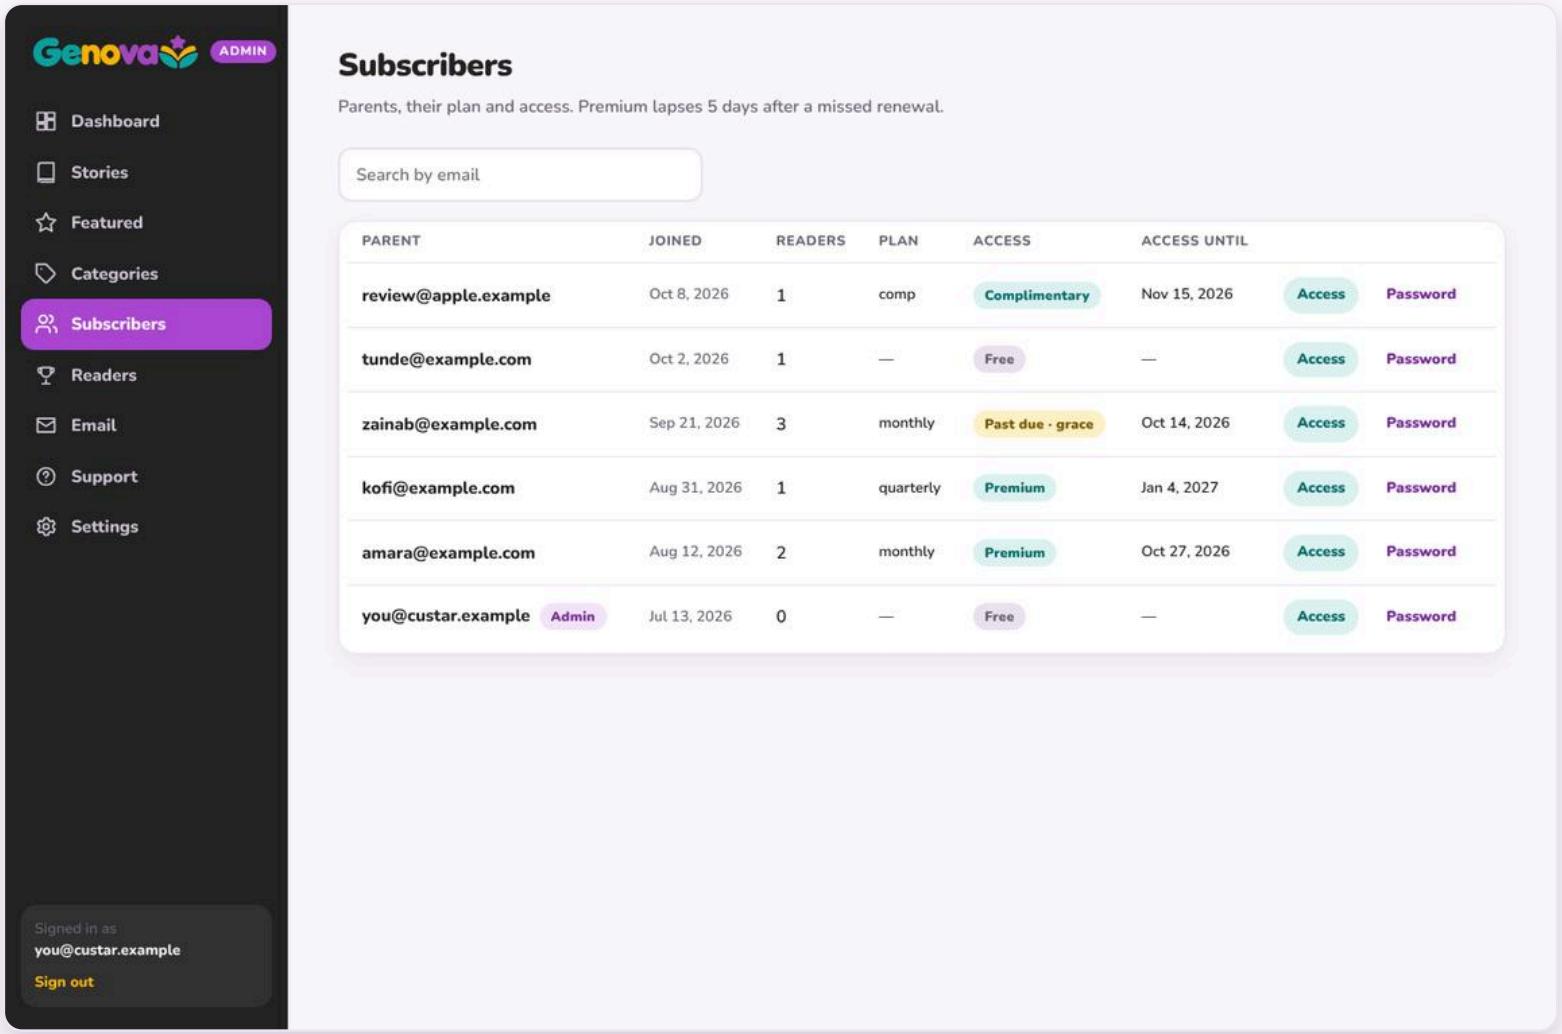

Categories

ADMIN DASHBOARD

Subscribers

Search parents and see their plan, access status and access-until date. Paid access ends 5 days after a missed renewal. Each row has Access and Password actions.

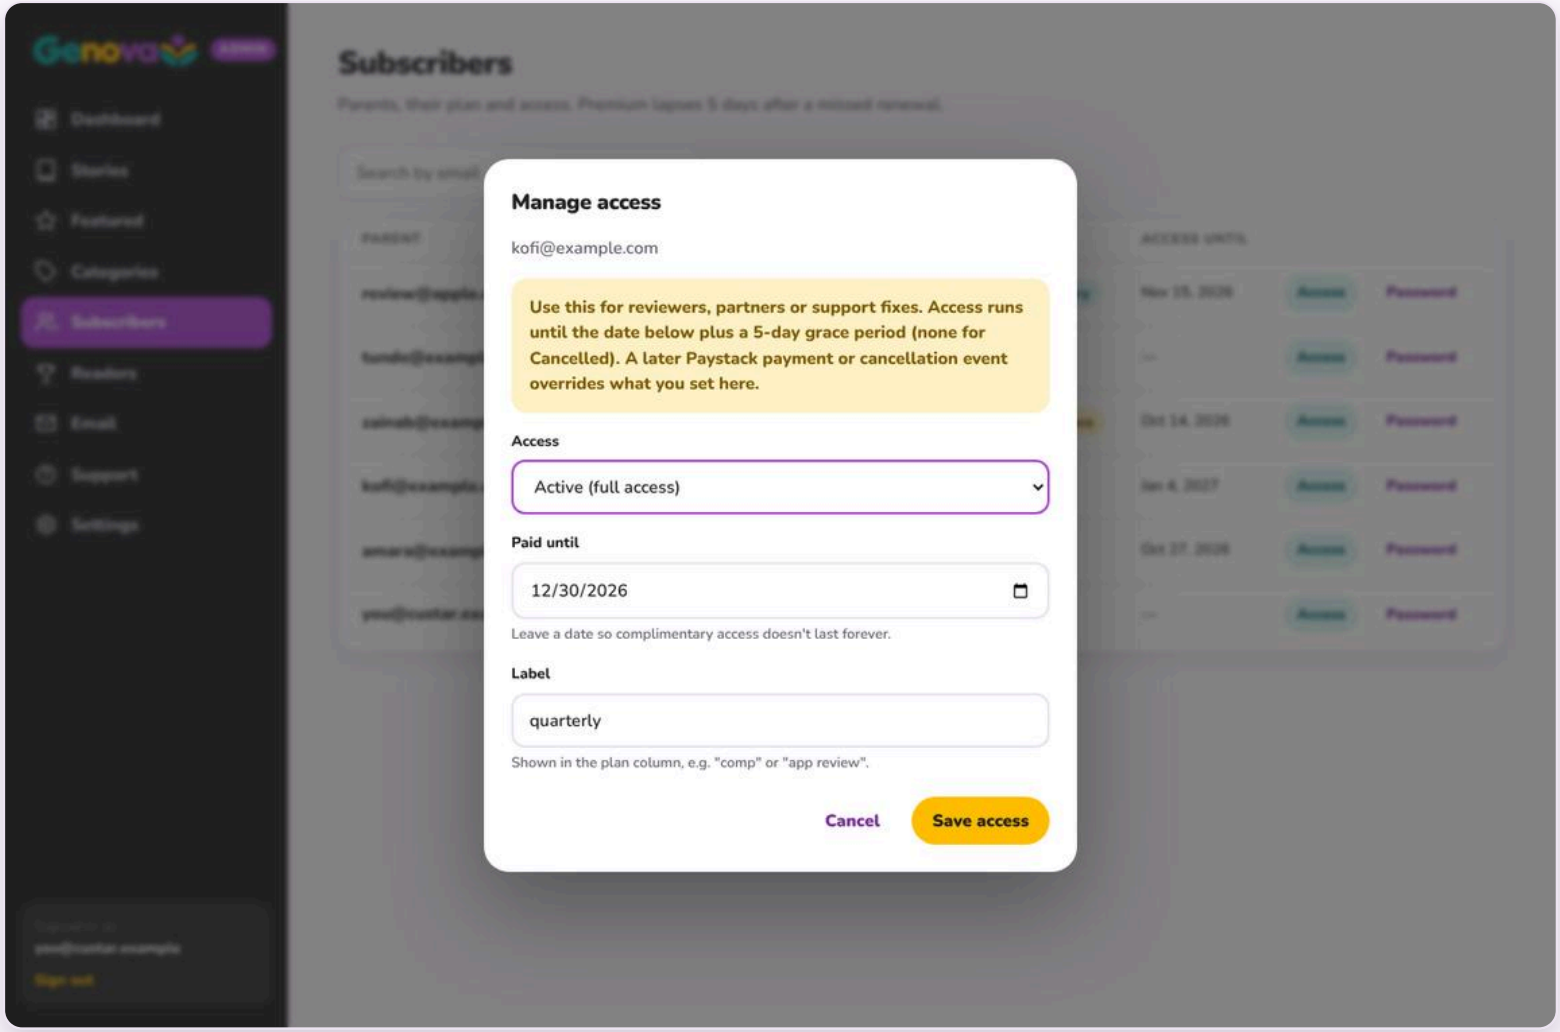

Subscribers

ADMIN DASHBOARD

Manage access

Grant or adjust access for app-store reviewers, partners and support fixes, with an end date. A later Paystack event overrides it.

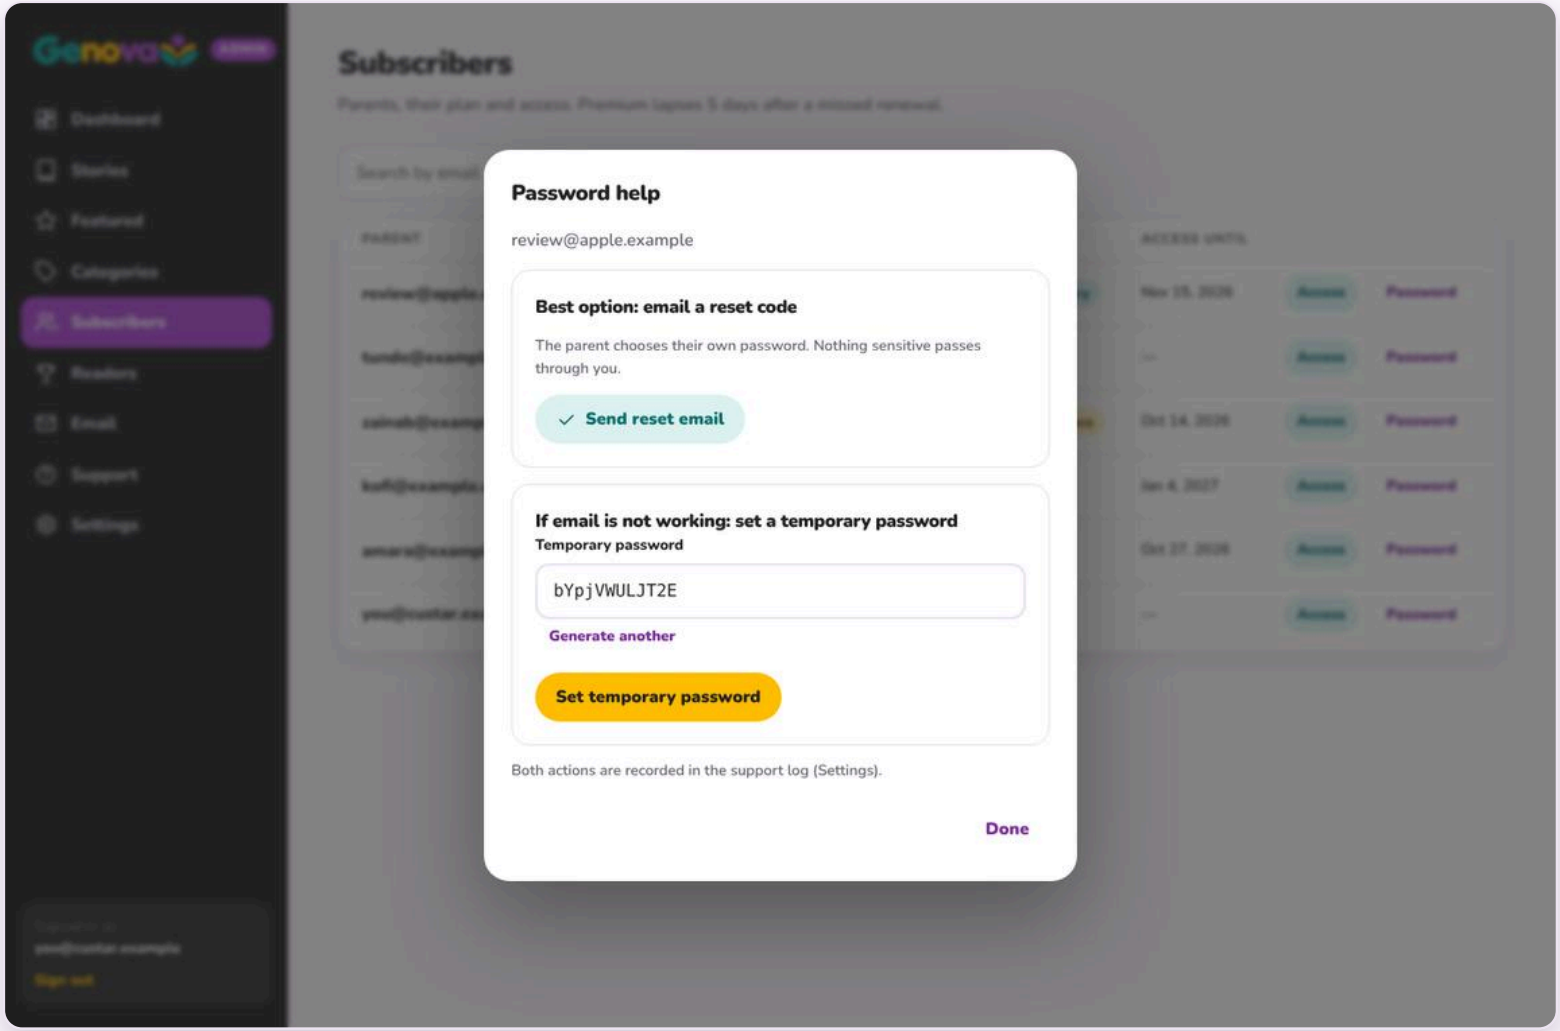

Manage subscriber access

ADMIN DASHBOARD

Password help

Best option: email the parent a reset code so they choose their own password. If email is not working, set a temporary password. Both actions are logged.

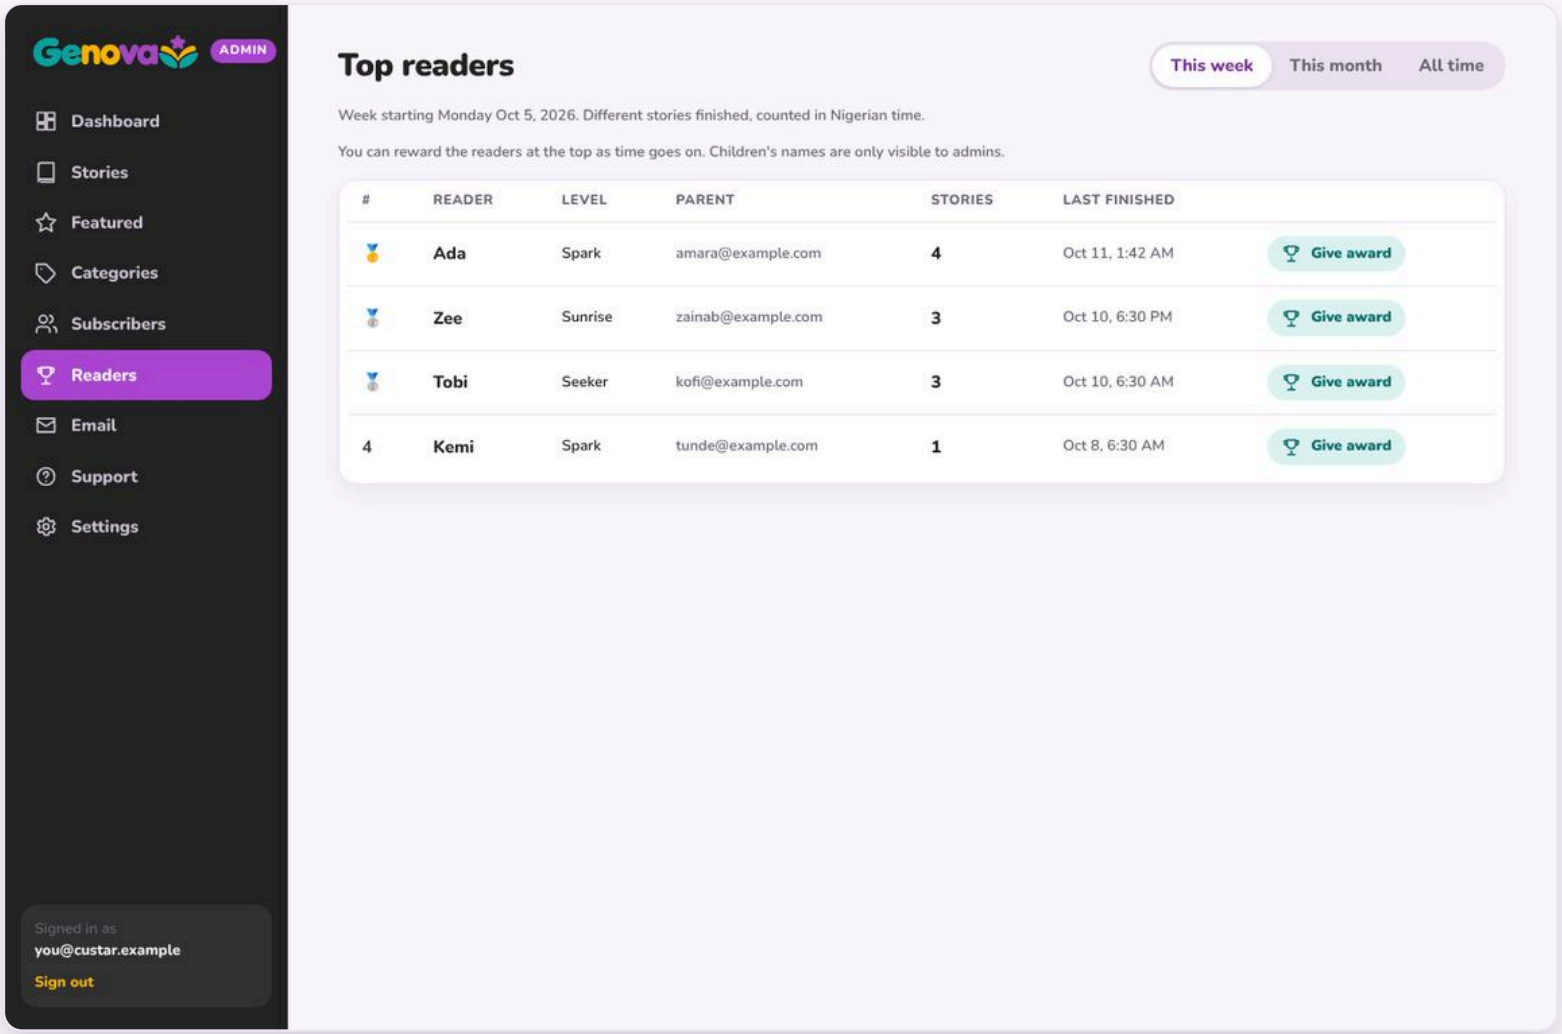

Password help

ADMIN DASHBOARD

Top readers

Who finished the most different stories this week, this month and all time (Nigerian time, weeks start on Monday). Only admins see the names.

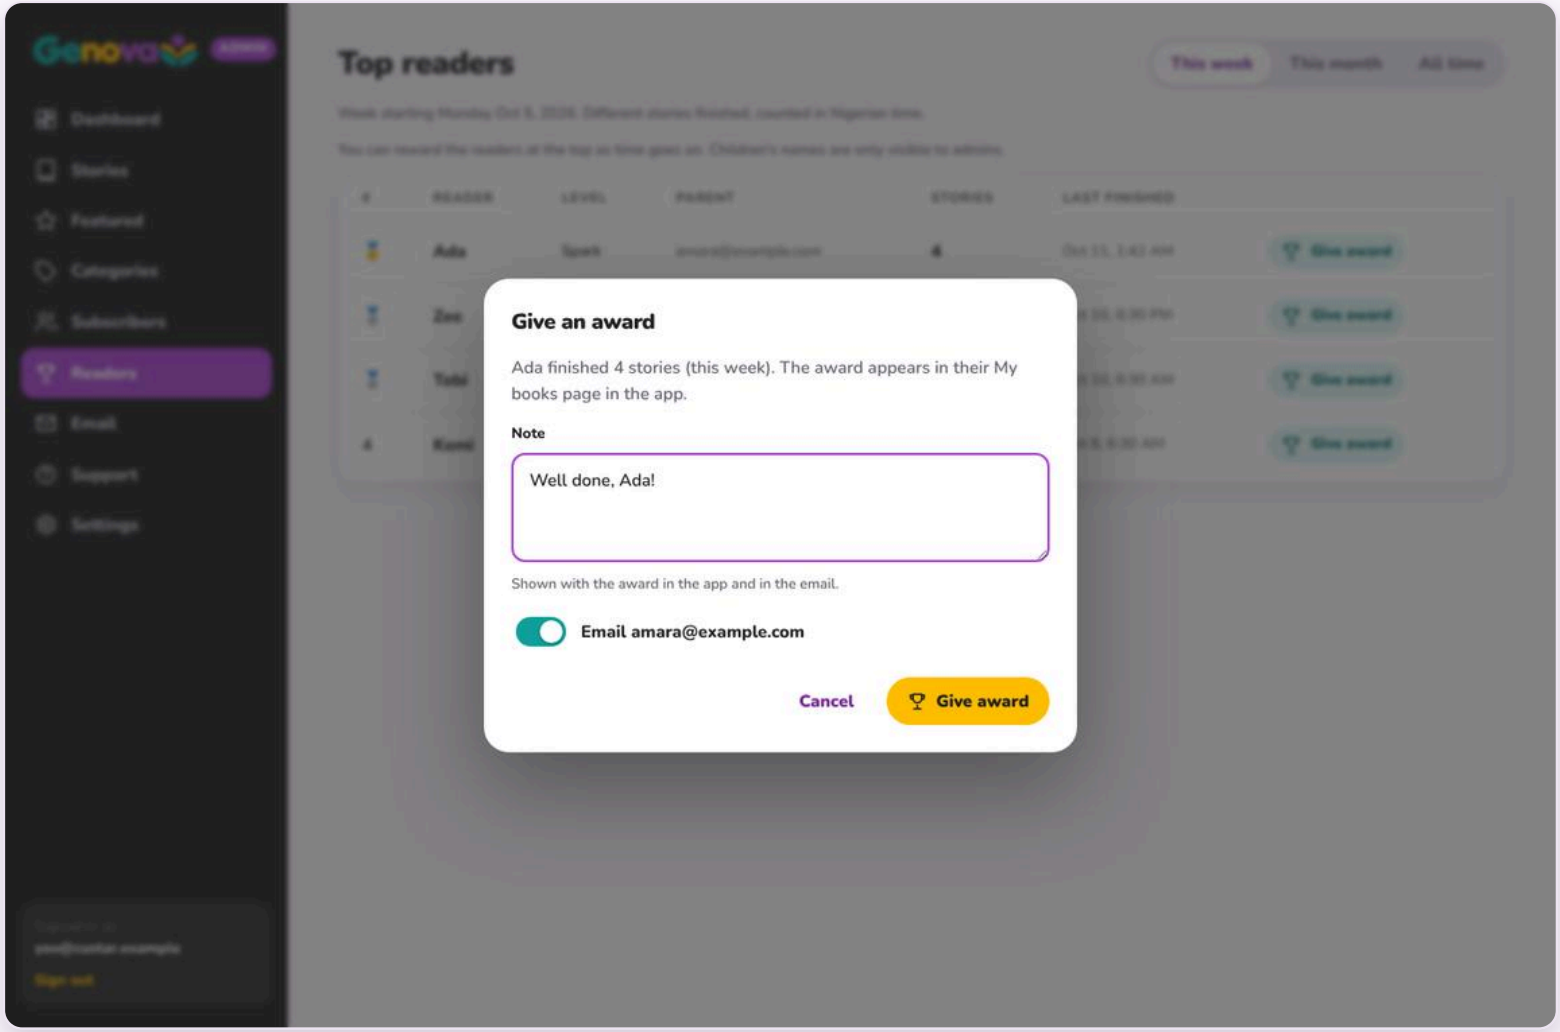

Top readers

ADMIN DASHBOARD

Give an award

Reward a reader as time goes on: add a note and optionally email the parent. The award shows up on the reader's My books page.

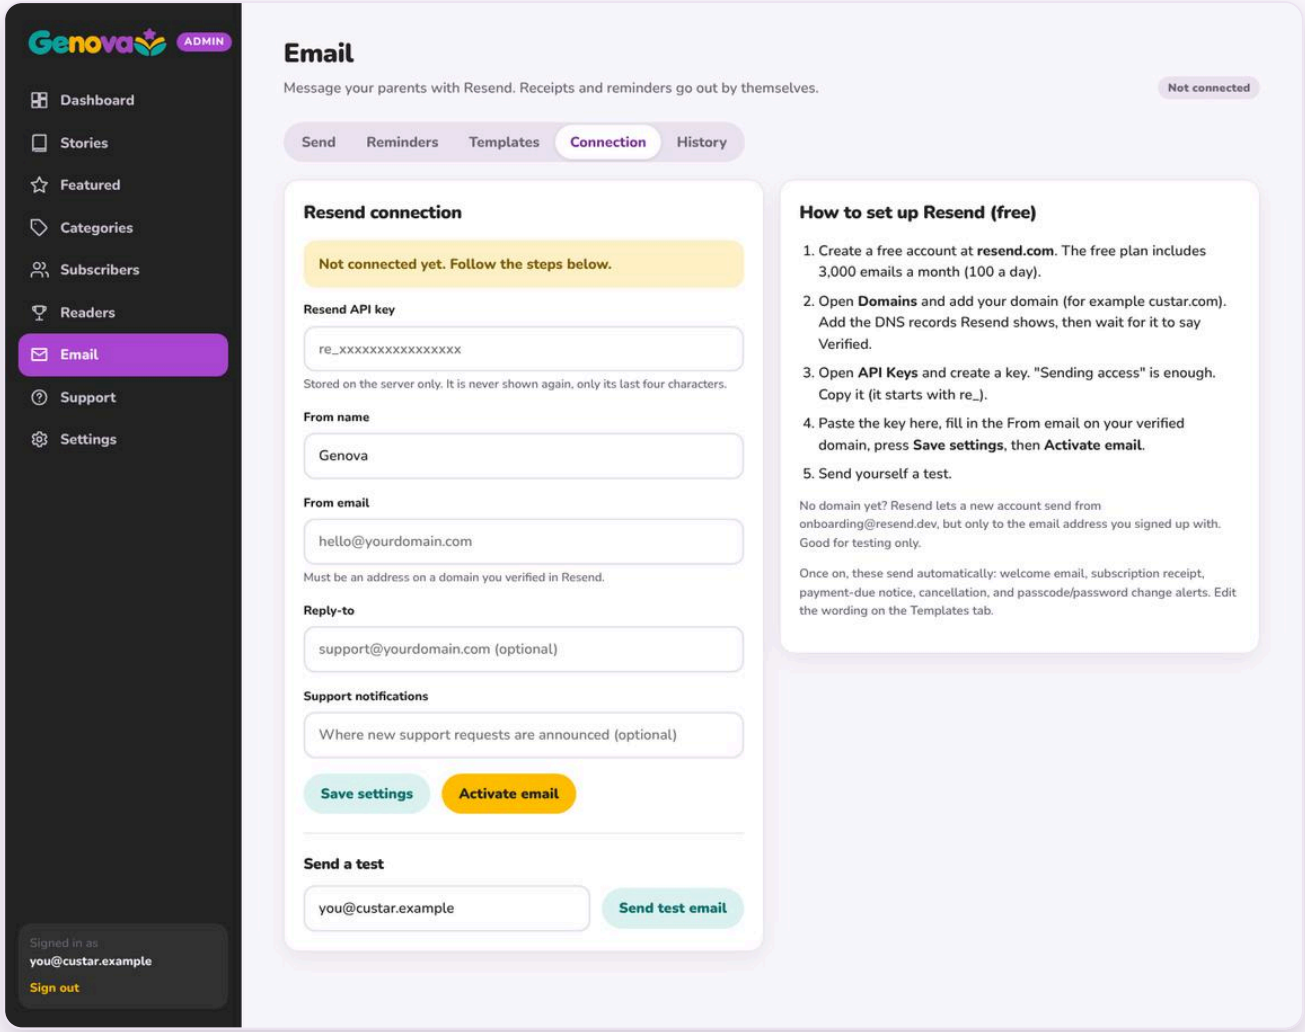

Give an award

ADMIN DASHBOARD

Email: connection

Paste a free Resend API key and press Activate. The key is stored on the server only and never shown again. Step-by-step help sits beside the form.

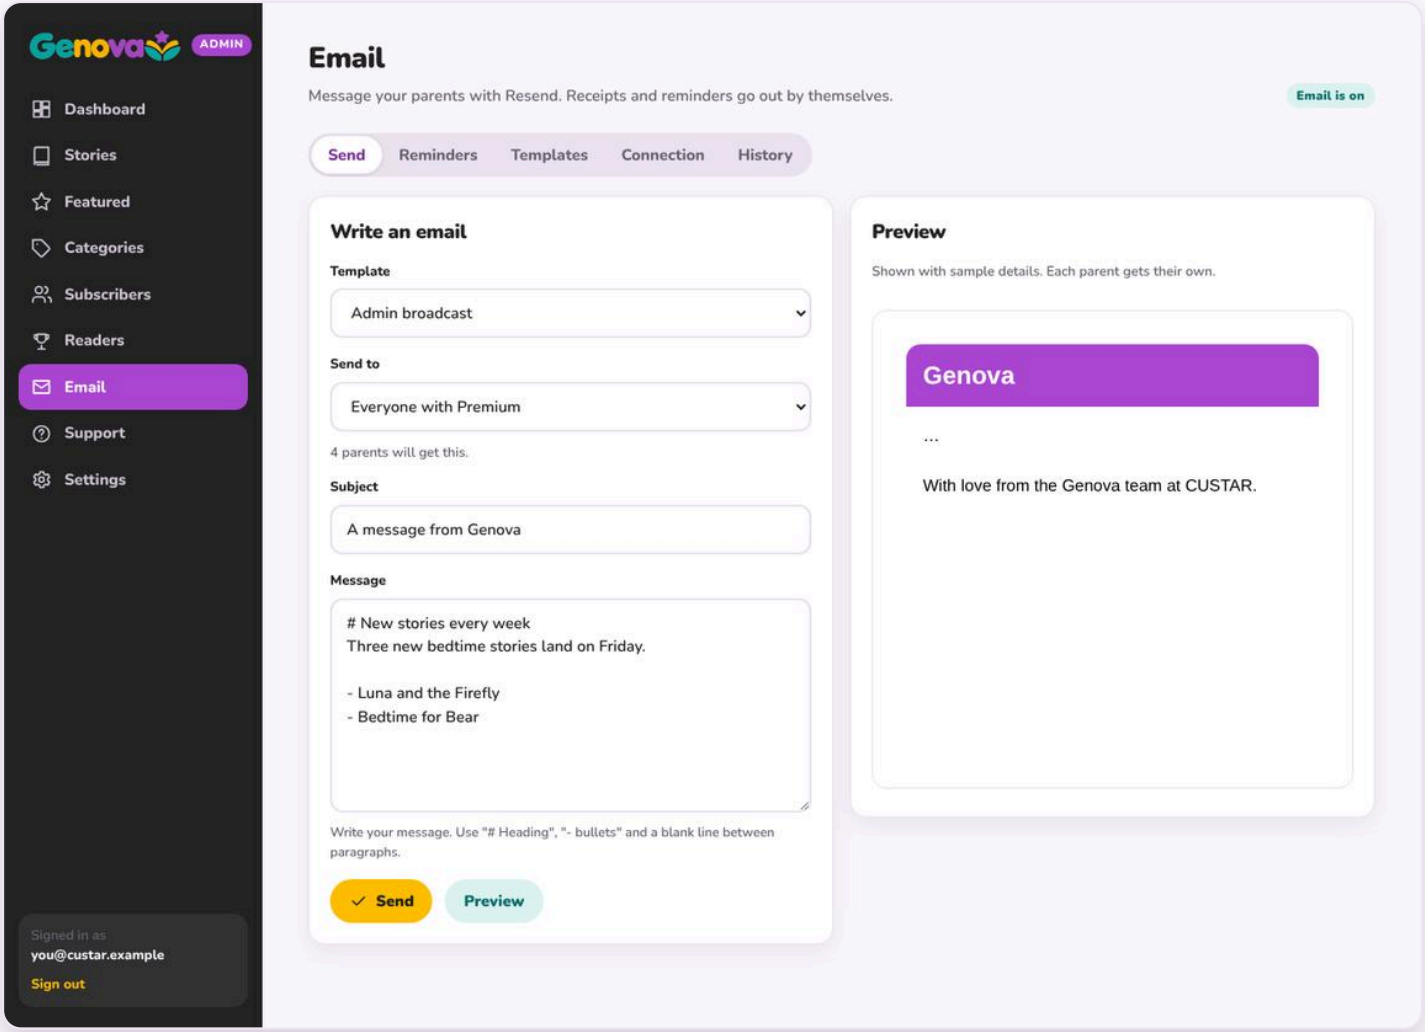

Email: connect Resend

ADMIN DASHBOARD

Email: send to parents

Write a message, pick the group (Premium, payment overdue, ending soon, Free or everyone), preview it as parents see it, then send.

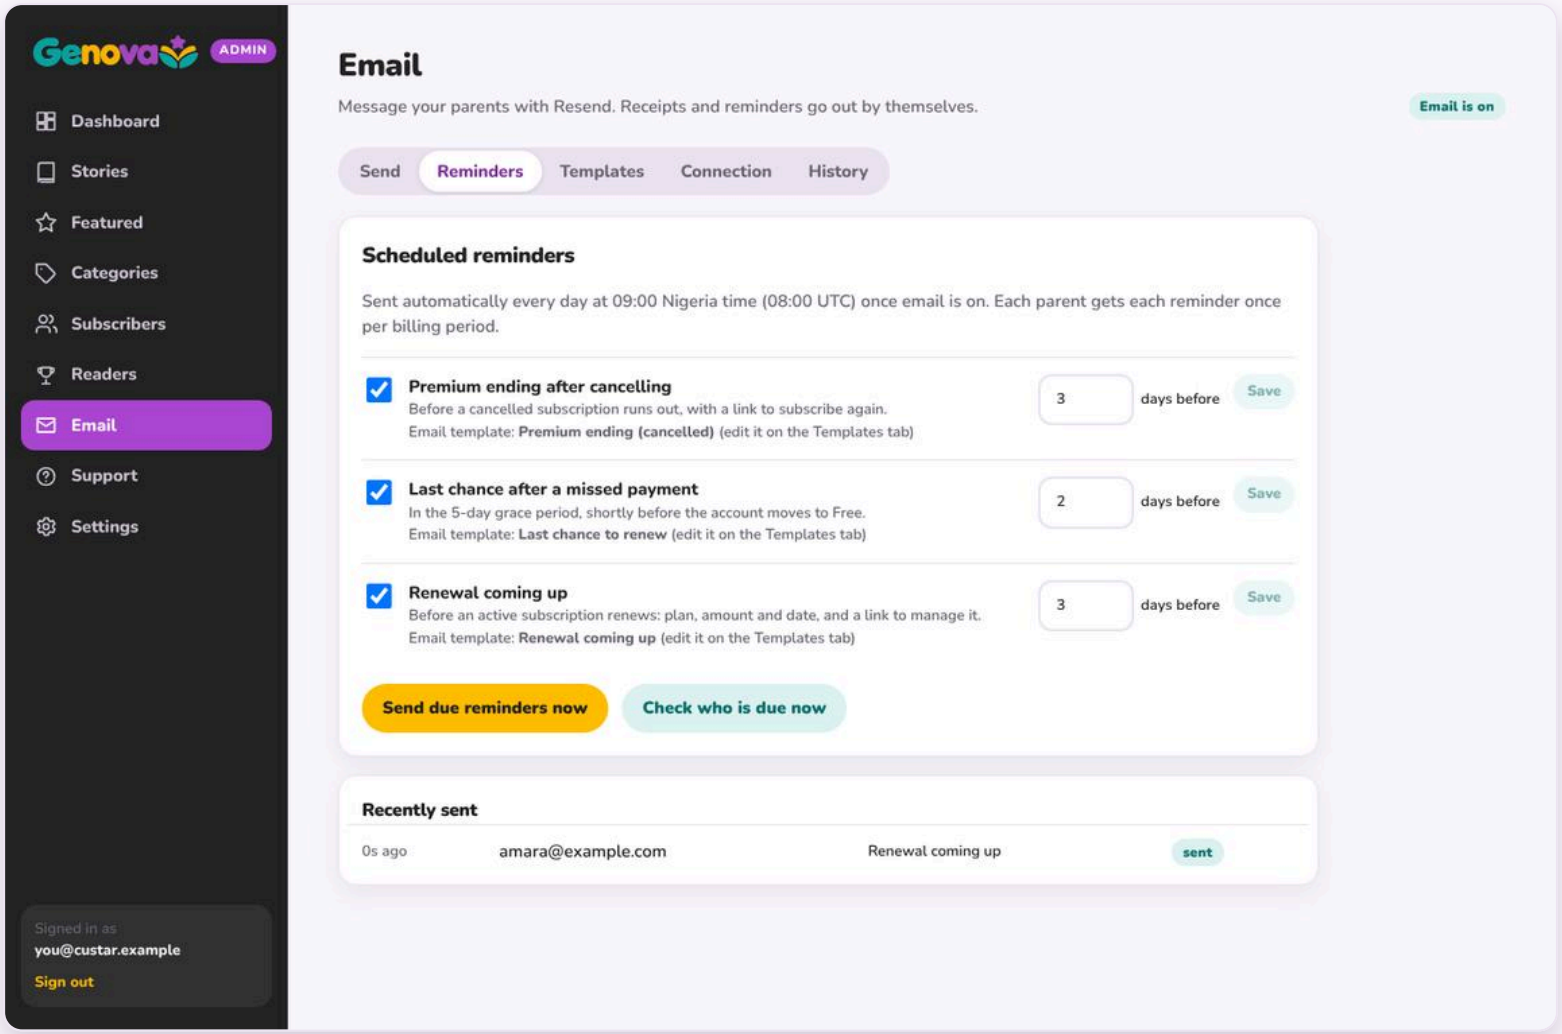

Email: write and preview

ADMIN DASHBOARD

Email: scheduled reminders

A daily job (09:00 Nigeria time) sends three reminders: renewal coming up, Premium ending after cancelling, and last chance after a missed payment. Each parent gets each reminder once per billing period.

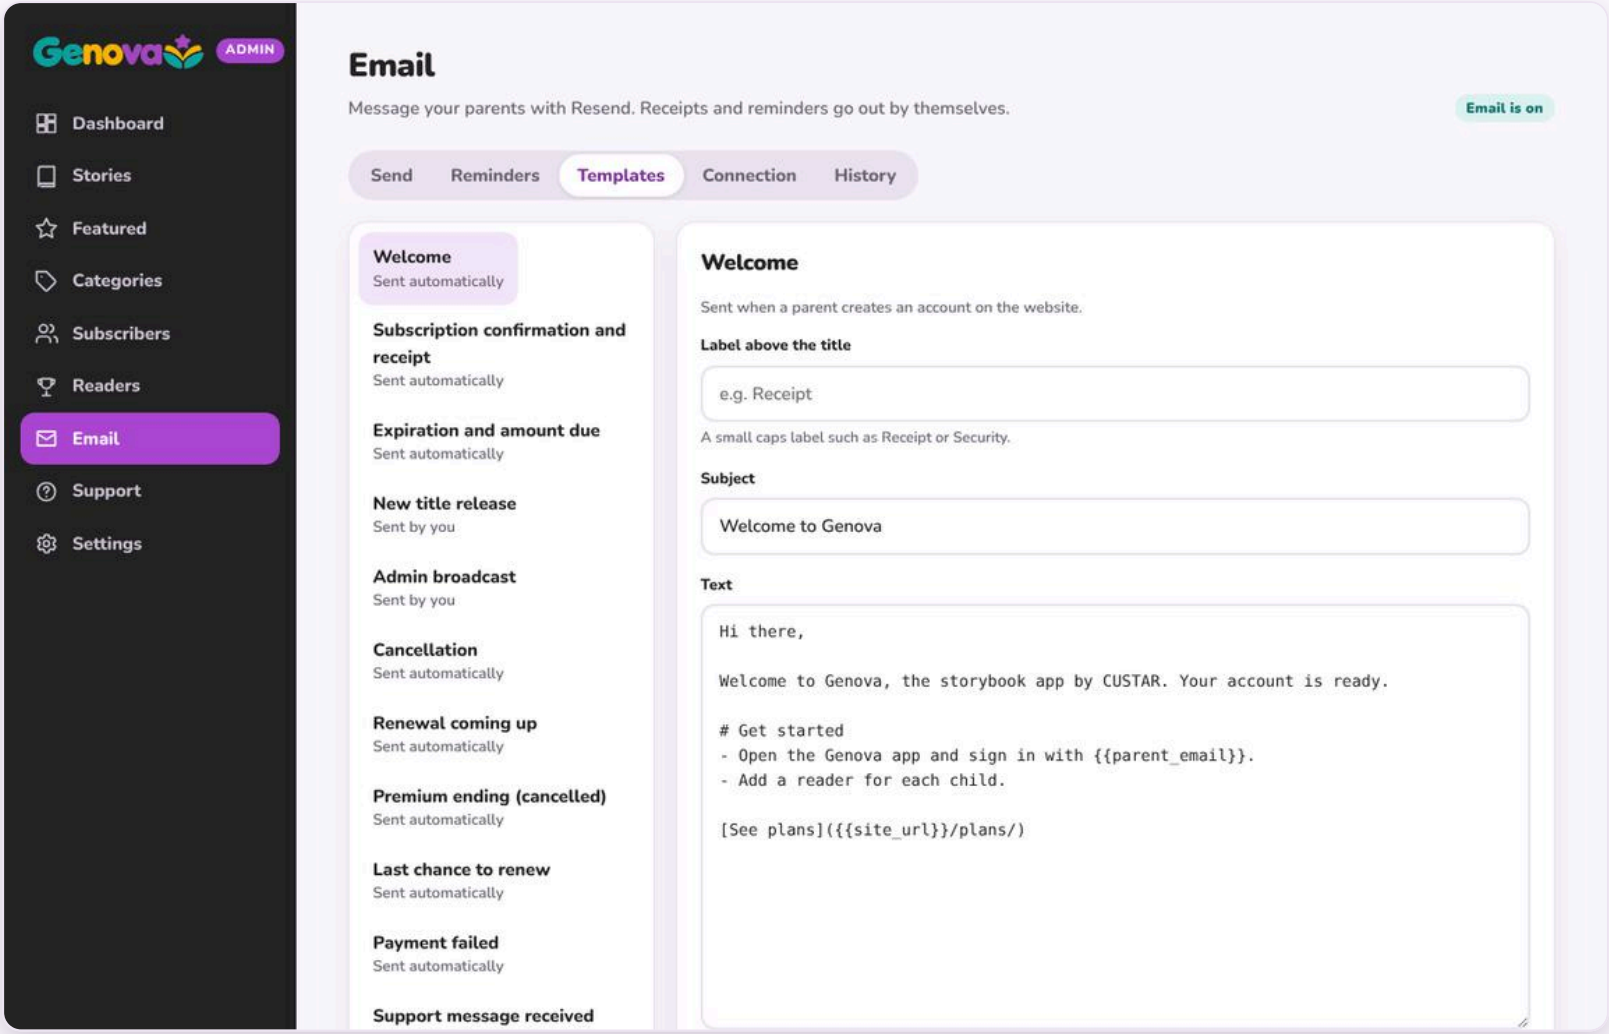

Email: scheduled reminders

ADMIN DASHBOARD

Email: templates (1 of 2)

Editable templates for the welcome, receipt, payment due, new title, broadcast, cancellation, security change, reminders and reader awards. Receipts, payment-due and cancellation emails go out automatically.
